I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- I. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- II. As the price / value / interest rates of the securities in which the Scheme/s invests fluctuate, the value of your investment in the Scheme/s may go up or down.
- III. The past performance of the Sponsors/AMC/Mutual Fund does not guarantee future performance of the Scheme/s.
- IV. The Name of the scheme (s) do not in any manner indicate either the quality of the Scheme, its future prospects or returns.
- V. Canara Bank and Robeco Groep N. V., being the Sponsors, are not responsible or liable for any loss resulting from the operation of the Scheme/s beyond the initial contribution of Rs. 10 Lacs made by it towards setting up Canara Robeco Mutual Fund.
- VI. The present scheme (s) is not a guaranteed or assured return scheme (s).

The Mutual Fund is defending and / or has filed cases in the Special Court constituted under the Special Court (Trial of Offences relating to transactions in Securities) Act, 1992 for the claims arising out of scam related transactions. The Fund has taken necessary steps as legally advised. Please refer to the clause on Penalties & Pending Litigation mentioned on the last page of the Scheme Information Document.

Scheme specific Risk Factors related to all the scheme

I. Price-Risk or Interest-Rate Risk: Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rate rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

II. Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of the security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme/s has invested in Government securities, there is no credit risk to that extent.

III. Reinvestment Risk: Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

IV. Liquidity Risk: This refers to the ease with which a security can be sold at or near to its valuation or yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer.

Different types of securities in which the Scheme/s would invest as given in the offer document carry different levels and types of risk. Accordingly the Scheme's risk may increase or decrease depending upon its investment pattern e.g. corporate bonds carry a higher amount of risk than Government securities. Further, even among corporate bonds, bonds which are AA rated are comparatively more risky than bonds which are AAA rated.

V. Securitized Debt: The Scheme (s) in accordance with the asset allocation may invest in domestic securitized debt such as asset backed securities (ABS) or mortgage backed securities (MBS). ABS means securitized debts wherein the underlying assets are receivables arising from personal loans, automobile loans, etc. MBS means securitized debts wherein the underlying assets are receivables arising from loans backed by mortgage of properties which can be residential or commercial in nature. ABS / MBS instruments reflect the undivided interest in the underlying of assets and do not represent the obligation of the issuer of ABS / MBS or the originator of the underlying receivables. The ABS / MBS holders have a limited recourse to the extent of credit enhancement provided. ABS / MBS holders will suffer credit losses in the event of the

delinquencies and credit losses in the underlying pool exceed the credit enhancement provided. As compared to the normal corporate or sovereign debt, ABS / MBS are normally exposed to a higher level of reinvestment risk. The fund intends to invest only in securitized instruments rated at least AA (SO) or its equivalent by a recognized credit rating agency. The securitized debt assets and the underlying asset classes like Housing Loans, Auto Loans and Corporate loans have the following risk factors:

A. Risk associated with Mortgage Backed Securities (MBS) - Housing Loans

Prepayment Risk: The Fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors.

Credit Risk: Delinquencies may happen which would reduce the principal amount. Typically MBS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility, then the monthly payouts to the Fund would reduce. Historically, it has been observed that housing loans have lower default rates as compared to other forms of credit.

Liquidity Risk: Historically the secondary market volume for securitised papers has been limited. This could limit the ability of the Fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

Conversion Risk: Conversion of loans from fixed rates to floating rate loans and vice versa could lead to a change in the expected cash flows from the loans.

B. Risk associated with Asset Backed Securities (ABS)-Auto loans

Prepayment Risk: The Fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors. Prepayment in auto loans is lower than housing loans as the shorter tenor of auto loans makes it economically unattractive to prepay after considering the prepayment charges.

Credit Risk: Delinquencies may happen which would reduce the principal amount. Typically ABS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility, then the monthly payouts to the Fund would reduce. Typically auto loans carry higher risk than MBS as the value retention of the underlying asset is higher in MBS as compared to the underlying asset of ABS.

Liquidity Risk: Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the Fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

C. Risk associated with Asset Backed Securities (ABS) - Corporate loans

Credit Risk: The Fund has an exposure to the Borrower/Borrowers and servicing of the instrument depends on the credit risk of the borrower. The value of the instrument would fluctuate depending upon the changes in the perceived level of credit risk as well as any actual default.

Prepayment Risk: The Borrower may prepay the receivables prior to their respective due dates. This may result in a change in the yield and tenor for the Fund.

Limited Liquidity and Price Risk: Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the Fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

VI. Risk associated with investing in Derivatives

As and when the Scheme trades in the derivatives market, there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls

to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "counter party") to comply with the terms of the derivatives contract. Other risk in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Derivatives can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involve uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.

The risk associated with the use of derivatives is different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Trading in derivatives has the following risks:

- a. An exposure to derivatives in excess of the hedging requirements can lead to losses.
- b. An exposure to derivatives can also limit the profits from a genuine investment transaction.
- c. Efficiency of a derivative market depends on the development of a liquid and efficient market for underlying securities.

VII. Risk associated with Securities Lending

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as the diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business set back and become unable to honour its commitments. This, along with a simultaneous fall in the value of collateral would render potential loss to the Scheme. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme will not be able to sell such lent out securities until they are returned.

Securities lending may involve the risk of default on the part of the borrower. However, this is unlikely to happen if the stock lending is carried out for stocks which are in dematerialised form and through an authorised stock lending Scheme, subject to appropriate Regulations.

The Investment Manager perceives such situations to be exceptional in nature. Although the Stock Market in India is still developing, considering the good demand for listed / quoted Equity Shares of reputed companies, the Scheme may choose to meet repurchase needs through temporary borrowings, within the permissible limits.

VIII. Other Risks:

Zero coupon or Deep Discount Bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specific date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face value. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the issuer. The market rates of zero coupon securities are generally more volatile than the market price of securities that pay interest periodically and are likely to respond to changes in interest rates to a greater degree than other coupon bearing securities having similar maturities and creditworthiness.

In the event of substantial investment by the Sponsor/s, or its associates in the Scheme(s), any redemption by these entities may have an impact on the performance of the Scheme(s).

Canara Robeco Mutual Fund will not be responsible for any loss of tax benefits in the event of winding up of the Scheme(s) or for any amendments in the tax laws that may affect the tax benefits available under the Scheme(s). The tax benefits are based on the present laws and rules in force.

IX Risks associated with investing in foreign securities / overseas investments / offshore securities

- Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.
- Since the Scheme would invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of such Scheme. To manage risks associated with foreign currency and interest rate exposure, the Fund may use derivatives for efficient portfolio management and hedging and portfolio rebalancing and in accordance with conditions as may be stipulated under the Regulations and by RBI from time to time.
- Investment in Foreign Securities involves a currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative

Related to Canara Robeco Monthly Income Plan

Risk associated with investing in Equities and Equity derivatives: The Scheme provides for investing a part of its corpus in equity and equity related instruments and may engage in equity derivatives for the purpose of hedging. The risk factors that are applicable for equity and equity related instruments and derivatives shall apply to this scheme too. The value of the Scheme investments may be affected by factors affecting capital markets generally, such as price and volume volatility in the stock markets, interest rates, currency exchange rates, foreign investments, changes in government policy, political, economic or other developments and closure of the stock exchanges.

Investment made in unlisted equity or equity-related securities may only be realisable upon listing of these securities.

Trading volumes, settlement periods and transfer procedures may restrict liquidity of investments in equity and equity related securities. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The length of the settlement may affect the Scheme in the event the Scheme has to meet large number of redemption.

The Investment Manager perceives such situations to be exceptional in nature.

Related to Canara Robeco Gilt (PGS)

As in the case of any fund investing in Central & State Government Securities, the NAV of the Scheme will be sensitive to changes in interest/Bank/Prime Lending Rates. In case of an increase in any of the above rates, the market value of existing investments may fall leading to a fall in NAV.

Being dedicated Gilt Scheme, any disruption in normal functioning of the market or extreme ill-liquidity in any one of the investments may affect the ability of the fund manager. In the event of large number of repurchase requests, the time taken by the Scheme for repurchase may become significant.

Related to Canara Robeco InDiGo Fund

1. The price of Gold may fluctuate due to various reasons which are:
 - a) Global gold supplies and demand, which is influenced by factors such as forward selling by gold producers, purchases made by gold producers to unwind gold hedge positions, central bank purchases and sales and productions and cost levels in major gold producing countries such as South Africa, United States and Australia.
 - b) Investor's expectations with respect to the rate of inflation
 - c) Currency Exchange Rates
 - d) Interest Rates
 - e) Investment and Trading activities of Commodity funds/Hedge funds

f) Global or regional political, economic or financial events and situations

In addition there is no assurance that gold will maintain its long-term value in terms of purchasing power in the future. In the event that the price of gold declines, the value of investment in units in which the Scheme has invested will, in general, decline proportionately.

2. There may be certain circumstances that may motivate large-scale sales of gold by the issuer of Gold ETFs which could decrease the price of gold and adversely affect the value of investment in the Gold ETFs in which the Scheme has invested.
3. The gold underlying the Gold ETFs in which the Scheme has invested may be subject to loss, damage, theft, or restriction on access. There is a risk that part or all of the underlying gold of the Gold ETFs could be lost, damaged or stolen. Access to the said gold could also be restricted by natural events (such as earthquake) or human actions (such as terrorist attack). Any of these actions may adversely affect investment value of the Gold ETFs in which the Scheme has invested.
4. Impact cost risk:

Impact costs are implicit costs also which is paid by liquidity demanders to liquidity providers. Generally, the best bid and ask prices quoted in the market are for only small transactions. Larger transactions may have to be executed at even less favorable prices. The additional cost is called an impact cost. For e.g. if the ruling market price of a security is Rs.500/- one may be able to buy/sell small quantities for that price. But, if one wishes to buy/sell huge quantities he might have to pay /receive higher/lower price.

Similarly, absence of adequate liquidity of Gold ETF units may impact the cost of purchasing and selling the Gold ETF units.

5. Changes in indirect taxes like custom duties for import, sales tax, VAT or any other levies will have an impact on the valuation of gold and consequently the NAV of the units in which the Scheme has invested.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS

The liquidity of the Scheme's investments inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemptions or of a restructuring of the Scheme's investment portfolio, there may be delays in the redemption of units. Please refer to the section on "Right to limit repurchases".

The value of the Scheme/s investments may be affected by factors affecting capital markets generally, such as price and volume volatility in the stock markets, interest rates, currency exchange rates, foreign investments, changes in government policy, political, economic or other developments and closure of the stock exchanges. The NAV of the Scheme will be sensitive to changes in Interest /Bank / Prime Lending Rates. In case of investment in Money Market Instruments and in

Central / State Govt. Securities by the Scheme, an increase in the Interest / Bank / Prime Lending Rates will impact the market value of existing investments leading to decrease in the Scheme's NAV.

Debt securities are subject to the risk of an issuer's inability to meet principal and interest payments on the obligations (Credit Risk). Debt securities may also be subject to price volatility due to such factors as interest sensitivity, market perception or creditworthiness of the issuer and general market liquidity (Market Risk). While it is the intention of the Investment Manager to invest primarily in highly rated debt securities, the Scheme may from time to time invest in higher yielding, lower rated securities but not below investment grade and also in un-rated securities subject to provisions and restrictions laid down by SEBI, which would enhance the degree of risk. Changes in Government Policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Scheme. The NAV of the scheme may be affected by the changes in the general market conditions, factors and forces affecting capital market in particular, level of interest rates, various market related factors, settlement periods and transfer procedures. If a Unit Holder invests in the schemes and acquire a substantial portion of the scheme units. The repurchase of units by the Unit Holder may have an adverse impact on the units of the schemes, because the timing of such repurchase may impact the ability of other Unit holders to repurchase their units.

The tax benefits described in this SID are as available under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor is advised to consult his/her own professional tax advisor.

The AMC, may consider the overall level of risk of the portfolio, invest in lower rated / un-rated securities, offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute risk of the portfolio.

Any disruption in the normal functioning of the Debt market or extreme illiquidity in any one of the Scheme's Securities, may affect the ability of The Fund Manager to buy or sell freely in the market. In the event of a large number of repurchase requests, the time taken by the Scheme for repurchase may become significant.

It may be noted that no prior intimation/indication would be given to investors when the composition asset allocation pattern of the Scheme undergo changes within the permitted band as mentioned in this document. In the event of substantial investment by the Sponsors and its associates in the scheme of the Mutual Fund, redemption of units by these entities may have an impact on the performance of the Scheme.

Investors should study this Scheme Information Document carefully in its entirety and should not construe the contents hereof as advice relating to legal, taxation, investment or any other matters. Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, before making a decision to invest/redeem Units. Canara Robeco Mutual Fund will not be responsible for any loss of tax benefits in the event of winding up of the Scheme or for any amendment in tax laws that may affect the tax benefits available under the Scheme. The tax benefits are based on the present laws and rules in force.

D. DEFINITIONS

In this Scheme Information Document (SID), the following words and expressions shall have the meaning specified herein, unless the context otherwise requires:

Applicable NAV	The NAV calculated for the Business Day on which Sale and Repurchase requests received by the Investment Manager or its authorized agents.
Applicant	Applicant means a person who applies for allotment of units of Canara Robeco in pursuance of this SID.
Asset Management Company OR AMC OR Investment Manager	Canara Robeco Asset Management Company Ltd. (CRAMC) incorporated under the provisions of the Companies Act, 1956 and approved by Securities and Exchange Board of India to act as the Asset Management Company for the scheme(s) of Canara Robeco Mutual Fund.
Allotment Date	The date on which the units of Canara Robeco Scheme (s) are allotted to the successful applicants from time to time and includes allotment made pursuant to the New Fund Offer.
Business Day	<p>A day not being:</p> <p>(1) A Saturday or Sunday; or</p> <p>(2) A day on which Banks in Mumbai or the Reserve Bank of India are closed , or</p> <p>(3) A day on which there is no RBI clearing/settlement of securities; or</p> <p>(4) A day on which both the Stock Exchanges, Mumbai and the National Stock Exchange of India Limited are closed, whether or not the banks are open; or</p> <p>(5) A day on which Purchase and Redemption of Units is suspended or a book closure period is announced by the Trustee / AMC; or</p> <p>(6) A day on which normal business cannot be transacted due to storms, floods, bandhs, strikes or such other events as the AMC may specify from time to time.</p> <p>Provided that the days when the banks in any location where the AMC's branch offices are located, are closed due to a local holiday, such days will be treated as non Business Days at such branches for the purposes of accepting fresh subscriptions. However, if the branch offices in such locations are open on such local holidays, then redemption and switch requests will be accepted at those branches, provided it is a Business Day for the Scheme on an overall basis.</p> <p>Notwithstanding the above, the AMC reserves the right to change the definition of Business Day and to declare any day as a Business Day or otherwise at any or all branch offices.</p>

To generate income by investing in a wide range of Debt Securities and Money Market instruments of various maturities and small portion in equities and Equity Related Instruments. However there can be no assurance that the investment objective of the Scheme will be realized.

Canara Robeco InDiGo (INcome from Debt Instruments & GOld) Fund

To generate income from a portfolio constituted of debt & money market securities along with investments in Gold ETFs. However, there can be no assurance that the investment objective of the Scheme will be achieved.

C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

Canara Robeco Liquid

The Asset Allocation pattern of the Scheme under normal circumstances would be as under:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
Money Market Instruments / call money	65	100	Low
Debt (including securitized debt)	0	35	Medium

Investment /purchase shall be made in debt and money market securities with maturity up to 91 days only fulfilling following conditions as per SEBI circular dated 19th January, 2009:

- a. In case of securities where the principal is to be repaid in a single payout the maturity of the securities shall mean residual maturity.
In case the principal is to be repaid in more than one payout then the maturity of the securities shall be calculated on the basis of weighted average maturity of security.
- b. In case of securities with put and call options (daily or otherwise) the residual maturity of the securities shall not be greater 91 day.

- c. In case the maturity of the security falls on a non-business day then settlement of securities to take place on the next business day.

Investment by Scheme in Securitised debt is limited to domestic securitized debt and shall not exceed 20% of the net assets as on the date of such investments.

Gross Notional Exposure by the Scheme in derivative instruments, for the purpose of hedging and portfolio rebalancing shall not exceed 30% of the net assets of the Schemes.

Canara Robeco Treasury Advantage Fund

The Asset Allocation pattern of the Scheme under normal circumstances would be as under:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
MMI / Call / Debt Instruments with residual average maturity of equal or less than one year	20	100	Low to Medium
Debt Instruments with residual average Maturity of more than one year (Including Securitised Debt)	0	80	Low to Medium

Investment by the Scheme in securitized debt is limited to domestic securitized debt and shall not exceed 15% the net assets at the time of investment.

Gross Exposure by the Scheme in derivative instruments, for the purpose of hedging and portfolio rebalancing shall not exceed 30% of the net assets of the Schemes.

Investment by the Scheme in Derivative Instruments (Interest Rate Swaps (IRS) and Forward Rate Agreements (FRA) shall not exceed 30% of the net assets of the Scheme as on the date of such investments.

Canara Robeco Floating Rate

The Asset Allocation pattern of the Scheme under normal circumstances would be as under:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
Indian Money Market Instruments	70	100	Low to Medium
Indian Debt Securities	0	30	Low to Medium

Exposure by the Fund in Securitised Debt shall not exceed 25% of the Net Assets of Scheme at the time of investment.

Gross Notional Exposure by the Fund in derivative instruments for the purpose of hedging and portfolio rebalancing shall not exceed 30% of the Net Assets of Scheme at the time of investment.

Total of investments in debt securities (including securitized debt), money market instruments and gross notional exposure in derivatives shall not exceed 100% of the net assets of the Scheme.

Canara Robeco Dynamic Bond Fund

The Asset Allocation pattern of the Scheme under normal circumstances would be as under:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
Government of India & Corporate Debt Securities (including Securitized Debt)*	0	70	Low to Medium
Money Market Instruments	30	100	Low

* Excluding Debt/GOI Securities with initial maturity of less than one year and Treasury bills.

Exposure by the Scheme in Securitized Debt shall not exceed 50% of the Net Assets of Scheme at the time of investment.

Exposure by the Scheme in derivative instruments for the purpose of hedging and portfolio rebalancing shall not exceed 30% of the Net Assets of Scheme at the time of investment.

The stock lending done by the Scheme shall not exceed 15% of the net assets of the Scheme as on the date of such lending and that the maximum limit per intermediary shall not exceed 5% of the net assets of the Scheme.

The Scheme may invest in Foreign Securities up to 10% of the net assets of the Scheme (subject to an overall limit of 10% of the net assets of the Fund) as on 31st March each relevant year of the investment.

Canara Robeco Short Term Fund

The Asset Allocation pattern of the Fund under normal circumstances would be as under:

Instruments	Allocation		Risk Profile
	Minimum	Maximum	High/Medium/Low
Money Market Instruments	60%	100%	Medium to low
Government of India & Debt Securities (including Securitized Debt)	0%	40%	Low

Securities lending done by the Fund shall not exceed 15% of the net assets of the Fund as on the date of such lending and the maximum limit per intermediary shall not exceed 5% of the net assets of the Fund.

Exposure by the Fund in Securitized Debt shall not exceed 30% of the Net Assets of Scheme at the time of investment.

Gross Notional Exposure by the Fund in derivative instruments for the purpose of hedging and portfolio rebalancing shall not exceed 30% of the Net Assets of Scheme at the time of investment.

Pending deployment of the funds in securities pursuant to the investment objectives of the Fund, such funds may be invested in short term deposits of scheduled commercial banks or in CBLO as permitted under the Regulations.

The Scheme may invest in Foreign Securities up to 10% of the net assets of the Scheme (subject to an overall limit of 10% of the net assets of the Fund) as on 31st March each relevant year of the investment

Canara Robeco Gilt PGS

The Asset Allocation pattern of the Scheme under normal circumstances would be as under:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
Govt.Securities / MMI/Call Money	0	100	Low

Gross Notional Exposure by the Scheme in derivative instruments, for the purpose of hedging and portfolio rebalancing shall not exceed 30% of the net assets of the Schemes

Canara Robeco Income

The Asset Allocation pattern of the Scheme under normal circumstances would be as under:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
Debt (Including Securitised Debt)	50	100	Medium
Money Market Instruments / Call Money	0	50	Low

Investment by Scheme in Securitised debt is limited to domestic securitized debt and shall not exceed 20% of the net assets as on the date of such investments.

Gross Notional Exposure by the Scheme in derivative instruments, for the purpose of hedging and portfolio rebalancing shall not exceed 30% of the net assets of the Schemes.

The stock lending done by the Scheme shall not exceed 15% of the net assets of the Scheme as on the date of such lending and that the maximum limit per intermediary shall not exceed 5% of the net assets of the Scheme.

The Scheme may invest in Foreign Securities up to 10% of the net assets of the Scheme (subject to an overall limit of 10% of the net assets of the Fund) as on 31st March each relevant year of the investment

Canara Robeco Monthly Income Plan

The Asset Allocation pattern of the Scheme under normal circumstances would be as under:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low

Equity & Equity Related	10	25	High
Debt (Including Securitised Debt) with MMI	75	90	Medium

Investment by Scheme in Securitised debt is limited to domestic securitized debt and shall not exceed 20% of the net assets as on the date of such investments.

Gross Notional Exposure by the Scheme in derivative instruments, for the purpose of hedging and portfolio rebalancing shall not exceed 30% of the net assets of the Schemes.

.Investment by the Schemes in ADRs/GDRs shall not exceed 10% of the net assets of the Scheme as on the date of such investments.

The stock lending done by the Scheme shall not exceed 15% of the net assets of the Scheme as on the date of such lending and that the maximum limit per intermediary shall not exceed 5% of the net assets of the Scheme.

The Scheme may invest in Foreign Securities up to 10% of the net assets of the Scheme (subject to an overall limit of 10% of the net assets of the Fund) as on 31st March each relevant year of the investment.

Canara Robeco InDiGo Fund

The Asset Allocation pattern of the Scheme under normal circumstances would be as under:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
Indian Debt and Money Market Instruments	65	90	Low to Medium
Gold ETFs	10	35	Low to Medium

Exposure by the Scheme in Securitised Debt shall not exceed 25% of the net assets of the Scheme at the time of investment.

Gross notional exposure by the Scheme in fixed income derivative instruments for the purpose of hedging and portfolio rebalancing shall not exceed 30% of the net assets of the Scheme at the time of investment.

Total of investments in debt securities (including securitized debt), money market instruments, Gold ETFs and gross notional exposure in derivatives shall not exceed 100% of the net assets of the Scheme

Asset Allocation – Applicable to all Schemes

Subject to the SEBI Regulations, the asset allocation pattern of the schemes indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. The portfolio would be reviewed periodically to address any deviations from the aforementioned allocations inter alia due to market changes. The AMC may from time to time, for a short term, alter the asset composition on defensive consideration and may also invest the funds available in repos, bank deposits in accordance with the provisions of SEBI (Mutual Funds) Regulations, 1996 and the circulars issued by SEBI from time to time.

Portfolio Rebalancing (all scheme except Canara Robeco Indigo Fund)

The scheme would endeavour to rebalance the portfolio within 10 days. In the event of the scheme not being rebalanced within the aforesaid period, justification for the same shall be placed before Investment Committee and reasons for the same shall be recorded in writing. Investment Committee shall then decide on the course of action. However, at all times the AMC shall endeavour to ensure that the portfolio would adhere to the overall investment objective of the schemes.

Portfolio Rebalancing (for Canara Robeco Indigo Fund)

The scheme shall rebalance the portfolio within 30 days. However, the scheme will endeavour to complete the rebalancing within 10 days. In the event of the scheme not being rebalanced within the aforesaid period, justification for the same shall be placed before Investment Committee and reasons for the same shall be recorded in writing. Investment Committee shall then decide on the course of action. However, at all times the AMC shall endeavour to ensure that the portfolio would adhere to the overall investment objective of the schemes.

Exposure Limits in Derivatives & Securitised debt

The Scheme wise limits are as follows:

Name of the Scheme	Gross Notional Exposure by the Scheme (s) in Derivative Instruments for the purpose of hedging and portfolio rebalancing	Investment in Securitised Debt
Canara Robeco Liquid	Maximum upto 30% of the net assets	Maximum upto 20% of the net assets
Canara Robeco Treasury Advantage Fund	Maximum upto 30% of the net assets	Maximum upto 15% of the net assets
Canara Robeco Floating Rate	Maximum upto 30% of the net assets	Maximum upto 25% of the net assets
Canara Robeco Dynamic Bond Fund	Maximum upto 30% of the net assets	Maximum upto 50% of the net assets
Canara Robeco Short Term Fund	Maximum upto 30% of the net assets	Maximum upto 30% of the net assets
Canara Robeco Gilt PGS	Maximum upto 30% of the net assets	No Investments would be made in Securitised debt Instruments
Canara Robeco Income	Maximum upto 30% of the net assets	Maximum upto 20% of the net assets
Canara Robeco Monthly Income Plan	Maximum upto 30% of the net assets	Maximum upto 20% of the net assets
Canara Robeco InDiGo Fund	Maximum upto 30% of the net assets	Maximum upto 25% of the net assets

Exposure to Derivatives:

Applicable to Canara Robeco Liquid, Canara Robeco Treasury Advantage Fund, Canara Robeco Floating Rate, Canara Robeco Monthly Income Plan, Canara Robeco Gilt PGS and Canara Robeco Income Fund

The Schemes shall follow exposure limits on Derivatives as per the limits permitted under the Regulations and shall be within the limits prescribed by the Board of Trustees, as provided above.

Applicable to Canara Robeco Short Term Fund, Canara Robeco Dynamic Bond Fund, Canara Robeco InDiGo Fund

The Schemes shall follow exposure limits on Derivatives as per the exposure limits permitted under the Regulations as per SEBI Circular No. DPND/Cir – 29/2005 dated 14th Sept. 2005 and shall be within the limits prescribed by the Board of Trustees, as provided above. SEBI vide its circular no. DNP/Cir-29/2005 dated September 14, 2005 permitted mutual funds to participate in derivatives trading subject to the observance of guidelines issued by SEBI. Mutual Funds are permitted to participate in the derivatives market at par with Foreign Institutional Investors (FII). Accordingly, the mutual funds shall be treated at par with a registered FII in respect of position limit in index futures, index options, stock options and stock futures contracts. The Mutual Fund will be considered as trading members like registered FIIs and the schemes of Mutual Funds will be treated as clients like sub-accounts of FIIs. As a part of the fund management process, the AMC may use appropriate derivative instruments in accordance with the investment objectives of the Scheme and as per procedure prescribed under the stated circular.

D. Where will the scheme invest?

Subject to the Regulations and the circular dated 19th Jan, 2009, the corpus of the Scheme (s) may be invested in all or any one of (but not exclusively) the following securities in accordance with the asset allocation pattern of the scheme:

Debt Instruments - include Govt. of India securities (zero coupon or coupon bearing Bonds), State Govt. Bonds, Bonds issued by local Govt, Govt. Agencies and other statutory bodies (with or without Govt. Guarantee), Bonds of Public Sector Undertakings, Debentures issued by public, private sector undertakings, Financial Institutions with or without ratings, Securitised Debt, Usance Bills (Bills of Exchange drawn on a term governed by the usage in trade or between the companies involved) and other Domestic Instruments either listed or unlisted having an original/residual maturity upto 91 days for Canara Robeco Liquid and 365 days for other debt oriented scheme (s).

Money Market Instruments - include Commercial Papers, Commercial Bills, Treasury Bills, Government Securities having an un-expired maturity up to one year, Call or Notice Money, (Call and Notice Money Market refers to the market for short term funds including overnight funds. Under call money market, funds are transacted on overnight basis and under notice money market, funds are transacted for the period between 2 days and 14 days) Certificate of Deposit, Usance Bills and any other like instruments as specified by the Reserve Bank of India / SEBI, from time to time. The Scheme proposes to invest in Collateralised Borrowing Lending Obligation (CBLO a discounted money market instrument available in electronic book entry form for the maturity period ranging from one day to ninety Days), Repos Treasury Bills, MIBOR Instruments, CPs, CDs and Govt. Securities having un-expired maturity up to one year. These securities may be listed or unlisted.

Securitized Debt - Securitised Debt is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. Asset Securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. A typical process of asset securitisation involves sale of specific receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company. The SPV in turn issues financial instruments (promissory notes, participation certificates or other

debt instruments) also referred to as “Securitized Debt” to the investors evidencing the beneficial ownership of the investors in the receivables.

Investment in “Securitized Debt” includes investment in Asset Backed Receivables and Future Flow Receivables. Such Securitized Debts are asset classes like, personal vehicle receivables, commercial vehicle receivables, mortgage backed receivables i.e housing finance receivables, lease receivables and corporate/consumer loan receivables.

The securities mentioned above could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of any maturity. The securities may be acquired through initial public offerings (IPOs), secondary market operations, private placement or rights offers. All investments in securities whether privately placed or otherwise will be in line with SEBI guidelines as applicable and the investment objectives and policies of the Scheme. Investment in unrated securities will be in accordance with SEBI guidelines as applicable.

The AMC may from time to time for a short term period under exceptional circumstances on defensive consideration modify / alter the investment pattern / asset allocation the intent being to protect the Net Asset Value of the Scheme & the interests of Unit Holders without seeking consent of the Unit Holders.

Government Securities (Applicable to Canara Robeco Gilt PGS)

The funds raised under the Scheme shall be invested only in Govt. Securities defined in Section 2(2) of the Public Debt Act, 1944.

The Scheme envisages investments in Government securities of various dates of maturity. A portion of the funds may also be invested in Treasury Bills and Call Money Market. The objective is to enhance the return by choosing appropriate maturity structure. The objective of the Scheme is to generate risk-free return through investments in sovereign securities issued by the Central Government and/or a State Government, and/or reverse repos and in such other securities as and when permitted by RBI / SEBI.

The Scheme will seek to underwrite issuance of Government Securities if any and to the extent permitted by SEBI/RBI and subject to the prevailing rules and regulations specified in this respect and may also participate in their auction from time to time.

Gold ETFs (Applicable to Canara Robeco InDiGo Fund)

Gold has been generally considered as a safe haven during times of economic upheavals and volatile equity markets. Since gold is traded internationally in London is typically denominated in US dollars, any negative news about the US economy like the recent apprehensions of the US economy getting into a recession, adversely impacts the value of US Dollar against other currencies of the world. This acts as one of the main factors on the rise in gold Prices, as was observed recently, as investors, especially those in US, generally seek to invest in gold and Gold ETFs to protect their financial risk in other Asset classes like equity etc.

The Scheme may invest in Gold ETFs after conducting thorough analysis of the fundamental factors determining demand and supply of gold. Investment in Gold ETFs will be guided by pre-set risk management limits and controls for ETF Investments.

The AMC may from time to time for a short term period under exceptional circumstances on defensive consideration modify / alter the investment pattern / asset allocation the intent being to protect the Net Asset Value of the Scheme & the interests of unit holders without seeking consent of the unit holders.

Canara Robeco Monthly Income Plan

Subject to the Regulations, the corpus of the Scheme may be invested in all or any one of (but not exclusively) the following securities:

- Equity and equity related instruments including preference shares, convertible bonds and debentures and warrants carrying the right to obtain equity shares.

- Foreign Securities in the countries with fully convertible currencies, short term instruments with highest rating (Foreign Currency Credit Rating) by accredited / registered credit rating agencies, such as A-1/AAA by Standard and Poor, P-1/AAA by Moody's, F1/AAA by Fitch IBCA, etc.
- Securities created and issued by the Central and State Governments and/or repos/reverse repos/in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- Money Market Instruments - include Commercial Papers, Commercial Bills, Treasury Bills, and Government Securities having an un-expired maturity up to one year, Call or Notice Money, Certificate of Deposit, Usance Bills and any other like instruments as specified by the Reserve Bank of India / SEBI, from time to time.
- Certificate of Deposit (CDs);
- Commercial Paper (CPs);
- ADR/GDR
- Derivative instruments like Forward Rate Agreements and such other derivative instruments permitted by SEBI/RBI
- Any other like instrument/s as permitted by SEBI/RBI from time to time

E. WHAT ARE THE INVESTMENT STRATEGIES?

Canara Robeco Liquid

The funds will be invested in Debt & Money Market Instruments (with un-expired maturity less than 91 days) offering reasonable liquidity and returns, with risk perceived by the Investment Manager and a portion of the funds will also be invested in rated and un-rated corporate bonds and debentures.

As per the guidelines of RBI, Mutual Funds have currently ceased to access the call money market. The Schemes therefore proposes to avail facility of reverse repos / CBLO (Collateralized Borrowing and Lending Obligations) to temporarily invest short term liquidity and to meet redemption / repurchase requirements.

The investments may be made in primary as well as secondary markets. As far as possible, the portfolio will be adequately diversified to reduce the risk of underperformance, arising out of unexpected security-specific factors. Investments will be made in State / Central Government Securities, Treasury Bills : i) supported by the ability to borrow from the Treasury ii) supported by sovereign guarantee or of the State Government iii) supported by the Government of India / State Government in any other manner.

Instruments	Credit risk
Call Money Lending	Low
MIBOR	Low
Central Govt. Securities	Sovereign
State Govt. Securities	Sovereign
Treasury Bills	Sovereign
Trade Bills Rediscounting	Low
Commercial Papers	Low to Medium
Certificate of Deposits	Low
Bonds of PSUs & FIs	Low
Rated Corporate Debentures / Securitised Debt	Low to Medium

The Scheme will seek to underwrite issuance of Government Securities if any, to the extent permitted by SEBI / RBI, subject to the prevailing rules and regulations specified in this respect. The Scheme may also participate in their auction from time to time.

There can be no assurance that the investment objective of the Scheme will be realized. It is, however, emphasized that, there is no risk of default of payment of either principal or interest amount in respect of investments made in Government Securities, Treasury Bills under this Scheme.

Canara Robeco Treasury Advantage Fund

Investment Focus and strategy:

The focus of the Scheme is to achieve the investment objective through investments in combination of debt and money market instruments having varied yield and maturity profile. The Scheme is positioned as an intervening investment avenue between long-term debt scheme and short term liquid scheme.

Apart from investment restrictions under SEBI (MF) Regulations, the Fund does not presently intend to follow any internal norms vis-a-vis limiting exposure to a particular security or sector etc. However, the Fund may consider imposing any restrictions depending on the changes in the investment environment from time to time.

The fund will be invested in debt and money market securities of different maturity and risk profiles. The investments may be made in primary as well as secondary markets. As far as possible, the portfolio will be adequately diversified to reduce the risk of under-performance arising out of unexpected security-specific factors. Investments will be made in State / Central Government Securities, Treasury Bills : i) supported by the ability to borrow from the Treasury ii) supported by sovereign guarantee or of the State Government, iii) supported by the Government of India / State Government in any other manner.

Instruments	Credit Risk
Call Money Lending	Low
MIBOR	Low
Central Govt. Securities	Sovereign
State Govt. Securities	- do -
Treasury Bills	- do -
Trade Bills Rediscounting	Low
Commercial Papers	Low to Medium
Certificate of Deposits	Low
Bonds of PSUs & FIs	- do -
Rated Corporate Debentures / Securitized Debt	Low to Medium

The Scheme will seek to underwrite issuance of Government Securities if any, to the extent permitted by SEBI/RBI, subject to the prevailing rules and regulations specified in this respect. The Scheme may also participate in their auction from time to time.

In addition, the Investment Manager will study the macro economic conditions, including political, economic environment and factors affecting liquidity and interest rates. The Investment Manager would use this analysis to assess the likely direction of interest rates and position the portfolio appropriately to take advantage of the same.

There can be assurance that the investment objective of the Scheme will be realized. It is however, emphasised that, there is no risk of default of payment of either principal or interest amount in respect of investments made in Government Securities, Treasury Bills, under this Scheme.

Investment Pattern and changes:

The above investment pattern is indicative and may be changed by the Investment Manager for defensive considerations and in accordance with change in Regulations from time to time, under the following circumstances:

1. During extreme volatility / ill-liquidity in the capital market/securities market.
2. In case of natural calamity, strikes, riots, bandhs etc., affecting the valuation of security.
3. Declaration of war or occurrence of insurgency, or any other serious or sustained financial, political or industrial emergency or disturbance, resulting in liquidity crunch.
4. During the time the Scheme receives bulk repurchase and/or bulk investment.

A review will be made as and when such variation takes place, and, if the variation is beyond 10%, the reasons thereof will be recorded. The variation from the stated asset allocation will be constantly monitored and such variation will be brought down to the specified asset allocation levels as soon as the normalcy is restored. A report of such variations will be made to the Board of the AMC and the Trustees on a regular basis.

Investment Pattern:

The corpus of the Scheme will be invested in quality debt and money market instruments. Subject to the Regulations, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities.

- Securities created and issued by the Central and State Governments and/or repos/reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds and treasury bills)
- Debt obligations of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee.
- Corporate debt and securities (of both public and private sector undertakings) including bonds, debentures, notes, strips etc.
- Money Market Instruments permitted by SEBI/RBI.
- Certificate of Deposits (CDs)
- Commercial Papers (CPs)
- Securitised Debt
- The non-convertible part of convertible securities.
- Any other domestic fixed income securities including structured obligations.
- Any international fixed income securities.
- Pass through, pay through or other participation certificates representing interest in a pool of assets including receivables.
- Any other like instruments as may be permitted by RBI/SEBI/such other Regulatory Authority from time to time.

The securities mentioned above and such other securities the scheme is permitted to invest could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of any maturity.

Canara Robeco Treasury Advantage Fund will seek to invest in high quality debt and money market instruments. The fund aims to identify securities which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous in depth credit evaluation of the securities proposed to be invested which will be carried out by the investment team of the AMC. Rated Debt instruments in which the scheme invests will be investment grade as rated by a credit rating agency. The AMC will be guided by the rating of Rating Agencies such as CRISIL, CARE, ICRFA and Duff and Phelps Credit Rating India Limited or any other rating agencies that may be registered with SEBI from time to time.

In case a debt instrument is not rated, necessary clearance of the Committee/Board as per the requirements of Regulations, Guidelines, Circulars will be obtained for such an investment. The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unit holders' interest.

Canara Robeco Floating Rate

Investment Focus and strategy:

The fund manager will take an active view of the interest rate movement by keeping a close watch on various macroeconomic parameters of the Indian economy as well as developments in global markets. Investment views /decisions will be taken on the basis of the various factors like, prevailing interest rate scenario, Government's borrowing program, level of liquidity in the banking system, inflation levels and overall macro economic growth of the country.

As far as possible, the portfolio will be adequately diversified to reduce the risk of under-performance arising out of unexpected security-specific factors. Investments will be made in State / Central Government Securities, Treasury Bills : i) supported by the ability to borrow from the Treasury ii) supported by sovereign guarantee or of the Statement Government, iii) supported by the Government of India / State Government in any other manner.

The Scheme will seek to underwrite issuance of Government Securities if any, to the extent permitted by SEBI/RBI, subject to the prevailing rules and regulations specified in this respect. The Scheme may also participate in their auction from time to time. In addition, the Investment Manager will study the macro economic conditions, including political, economic environment and factors affecting liquidity and interest rates. The Investment Manager would use this analysis to assess the likely direction of interest rates and position the portfolio appropriately to take advantage of the same. There can be assurance that the investment objective of the Scheme will be realised. It is however, emphasised that, there is no risk of default of payment of either principal or interest amount in respect of investments made in Government Securities, Treasury Bills, under this Scheme.

Investment Pattern and changes

Subject to the SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unitholders. The portfolio would be reviewed periodically to address any deviations from the aforementioned allocations interalia due to market changes. The AMC may from time to time, for a short term, alter the asset composition on defensive consideration and may also invest the funds available in repos, bank deposits in accordance with the provisions of SEBI (Mutual Funds) Regulations, 1996 and the circulars issued by SEBI from time to time.

Canara Robeco Dynamic Bond Fund

Investment Focus and strategy:

Canara Robeco Dynamic Bond Fund is an open ended debt fund having a primary objective to seek to generate income from a portfolio of debt and money market securities. The Fund will invest in debt securities in order to generate consistent superior risk adjusted returns as per the investment objectives of the fund. The Fund may

invest a portion of the portfolio in Money Market Instruments and the remaining investment will be made in securities of varying maturity. The asset allocation for the Fund shall depend on prevailing market conditions. When the market outlook is bullish, the fund manager would increase the exposure to debt instrument with maturity over one year and likewise when the outlook is bearish, the exposure to such long dated securities will be reduced. The Fund shall take into account the following parameters while decisions for investments are taken:

Liquidity of securities, Rating, Maturity profile, Company's growth prospects, Quality of the security, and prevailing interest rate scenario. The Fund will also take into account risk management tools like modified duration, VAR and convexity for efficient management of the Fund investments.

The Fund may also use various derivatives and hedging products from time to time as would be available and permitted by SEBI in an attempt to protect the value of the portfolio and enhance Unit Holder's interest. The Fund may invest in other debt/income/fixed maturity/interval schemes managed by the AMC or such schemes managed by any other Mutual Funds, provided it is in conformity to the investment objectives of the Fund and in terms of the prevailing Regulations. The Investment Manager will monitor the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The Investment Manager would use this analysis to assess the likely direction of interest rates and position the portfolio appropriately to take advantage of the same. Apart from investment restrictions under SEBI (MF) Regulations, the Fund does not presently intend to follow any internal norms vis-a-vis limiting exposure to a particular scrip or sector etc. However, the Fund may consider imposing any restrictions depending on the changes in the investment environment from time to time. The investments may be made in primary as well as secondary markets. As far as possible, the portfolio will be adequately diversified to reduce the risk of underperformance, arising out of unexpected security-specific factors.

Investment Pattern and changes:

The above investment pattern is indicative and may be changed by the Investment Manager for defensive considerations and in accordance with change in Regulations from time to time, under the following circumstances:

1. During extreme volatility / ill-liquidity in the capital market/securities market.
2. In case of natural calamity, strikes, riots, bandhs etc., affecting the valuation of security.
3. Declaration of war or occurrence of insurgency, or any other serious or sustained financial, political or industrial emergency or disturbance, resulting in liquidity crunch.
4. During the time the Scheme receives bulk repurchase and/or bulk investment.

A review will be made as and when such variation takes place, and, if the variation is beyond 10%, the reasons thereof will be recorded. The variation from the stated asset allocation will be constantly monitored and such variation will be brought down to the specified asset allocation levels as soon as the normalcy is restored. A report of such variations will be made to the Board of the AMC and the Trustees on a regular basis.

Canara Robeco Short Term Fund

Investment Focus and strategy:

Canara Robeco Short Term Fund is an open ended debt fund with an objective to seek to generate income from a portfolio constituted of short to medium term debt and money market securities.

The characteristics of this product are similar to that of a debt fund. Canara Robeco Mutual Fund offers Canara Robeco Liquid Fund for investing short term surpluses and Canara Robeco Income Fund for long term investments. Taking into consideration the investment profile, this fund is aimed to be positioned between the liquid fund and the income fund.

The Fund will invest in debt securities in order to generate consistent superior risk adjusted returns as per the investment objectives and aims to maintain a modified duration not exceeding two years under normal circumstances.

The Fund may invest a portion of the portfolio in Money Market Instruments and the remaining investment will be made in securities of varying maturity. The asset allocation for the Fund shall depend on prevailing market conditions.

The Fund shall take into account the following parameters while decisions for investments are taken:

Liquidity of securities, Rating, Maturity profile, Company's growth prospects, Quality of the security, and prevailing interest rate scenario. The Fund will also take into account risk management tools like modified duration, VAR and convexity for efficient management of the Fund investments.

The Fund may also use various derivatives and hedging products from time to time as would be available and permitted by SEBI in an attempt to protect the value of the portfolio and enhance Unit Holder's interest.

The Fund may invest in other debt/income/fixed maturity/interval schemes managed by the AMC or such schemes managed by any other Mutual Funds, provided it is in conformity to the investment objectives of the Fund and in terms of the prevailing Regulations.

The Investment Manager will monitor the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The Investment Manager would use this analysis to assess the likely direction of interest rates and position the portfolio appropriately to take advantage of the same.

Apart from investment restrictions under SEBI (MF) Regulations, the Fund does not presently intend to follow any internal norms vis-a-vis limiting exposure to a particular scrip or sector etc. However, the Fund may consider imposing any restrictions depending on the changes in the investment environment from time to time.

The investments may be made in primary as well as secondary markets. As far as possible, the portfolio will be adequately diversified to reduce the risk of underperformance, arising out of unexpected security-specific factors.

Investment Pattern and changes:

The above investment pattern is indicative and may be changed by the Investment Manager for defensive considerations and in accordance with change in Regulations from time to time, under the following circumstances:

1. During extreme volatility / ill-liquidity in the capital market/securities market.
2. In case of natural calamity, strikes, riots, bandhs etc., affecting the valuation of security.
3. Declaration of war or occurrence of insurgency, or any other serious or sustained financial, political or industrial emergency or disturbance, resulting in liquidity crunch.
4. During the time the Fund receives bulk repurchase and/or bulk investment.

A review will be made as and when such variation takes place, and, if the variation is beyond 10%, the reasons thereof will be recorded. The variation from the stated asset allocation will be constantly monitored and such variation will be brought down to the specified asset allocation levels as soon as normalcy is restored. A report of such variations will be made to the Board of the AMC and the Trustees on a regular basis.

Canara Robeco Gilt PGS

Investment Focus and strategy:

The investments may be made in primary as well as secondary markets. As far as possible, the portfolio will be adequately diversified to reduce the risk of underperformance, arising out of unexpected security-specific factors.

The funds will be invested only in Government Securities of different maturities. The investments may be made in primary as well as secondary markets. As far as possible, the portfolio will be adequately diversified to reduce the risk of under-performance, arising out of unexpected security-specific factors.

The Scheme being open ended, some portion of the portfolio will be invested in short term government securities so as to meet the normal repurchase requirements. The remaining investment will be made in securities which are reasonably liquid and of varying maturity.

The investment pattern of the Scheme is indicative and may be changed by the Fund Manager for defensive considerations. The funds raised under the Scheme shall be invested only in Govt. Securities defined in Section 2(2) of the Public Debt Act, 1944.

Canara Robeco Income

Investment Focus and strategy:

The funds will be invested in debt and money market securities of different maturities and risk profiles offering reasonable liquidity and returns, with risk perceived by the Investment Manager and a portion of the funds will also be invested in rated and un-rated corporate bonds and debentures.

As per the guidelines of RBI, Mutual Funds have currently ceased to access the call money market. The Schemes therefore proposes to avail facility of reverse repos / CBLO (Collateralized Borrowing and Lending Obligations) to temporarily invest short term liquidity and to meet redemption / repurchase requirements.

The investments may be made in primary as well as secondary markets. As far as possible, the portfolio will be adequately diversified to reduce the risk of underperformance, arising out of unexpected security-specific factors. Investments will be made in State / Central Government Securities, Treasury Bills : i) supported by the ability to borrow from the Treasury ii) supported by sovereign guarantee or of the State Government iii) supported by the Government of India / State Government in any other manner.

Instruments	Credit risk
Call Money Lending	Low
MIBOR	Low
Central Govt. Securities	Sovereign
State Govt. Securities	Sovereign
Treasury Bills	Sovereign
Trade Bills Rediscounting	Low
Commercial Papers	Low to Medium
Certificate of Deposits	Low
Bonds of PSUs & FIs	Low
Rated Corporate Debentures / Securitised Debt	Low to Medium

The Scheme will seek to underwrite issuance of Government Securities if any, to the extent permitted by SEBI / RBI, subject to the prevailing rules and regulations specified in this respect. The Scheme may also participate in their auction from time to time.

There can be no assurance that the investment objective of the Scheme will be realized. It is, however, emphasized that, there is no risk of default of payment of either principal or interest amount in respect of investments made in Government Securities, Treasury Bills under this Scheme.

The Scheme being open ended, some portion of the portfolio may be invested in Money Market Instruments so as to meet the normal repurchase requirements. The remaining investment will be made in securities which are either expected to be reasonably liquid or of varying maturity. However, the NAV of the Schemes may be affected, if the securities invested in are rendered illiquid after investment.

The Investment Manager targets to identify securities which offer optimum level of yield at lower level of risks. Rated debt instruments in which the Scheme invests will be of investment grade as rated by the credit rating agency. The Investment Manager will be guided by the ratings of Rating Agencies such as CRISIL, CARE, ICRA or any other agency approved by SEBI for this purpose. The Investment Manager may also invest in un-rated securities subject to the provisions and restrictions laid down by SEBI.

In addition, the Investment Manager will monitor the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The Investment Manager would use this analysis to assess the likely direction of interest rates and position the portfolio appropriately to take advantage of the same.

The Scheme, in order to achieve the objectives, will carefully select the debt securities of various maturities and risk profile. Such as Central / State Govt. Securities, Bonds of PSU / FIs, Corporate Debt of both public and private sector undertakings, Certificate of Deposits, Commercial Papers and such other instruments. The securities mentioned above could be listed or un-listed, secured or unsecured, rated or un-rated of varying maturity. The securities may be acquired through IPO, secondary market operations, private placements, rights offer or negotiated deals.

Investment Pattern and changes:

Subject to the SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unitholders. The portfolio would be reviewed periodically to address any deviations from the aforementioned allocations inter alia due to market changes. The AMC may from time to time, for a short term, alter the asset composition on defensive consideration and may also invest the funds available in repos, bank deposits in accordance with the provisions of SEBI (Mutual Funds) Regulations, 1996 and the circulars issued by SEBI from time to time.

Canara Robeco Monthly Income Plan

Investment Focus and strategy:

The funds will be invested in debt and money market securities of different maturities and risk profiles. However, in the case of Canara Robeco Monthly Income Plan. The funds will be invested in Money Market Instruments (with un-expired maturity less than one year) offering reasonable liquidity and returns, with risk perceived by the Investment Manager and a portion of the funds will also be invested in rated and un-rated corporate bonds and debentures.

As per the guidelines of RBI, Mutual Funds have currently ceased to access the call money market. The Schemes therefore proposes to avail facility of reverse repos / CBLO (Collateralized Borrowing and Lending Obligations) to temporarily invest short term liquidity and to meet redemption / repurchase requirements.

Investments will be made in State / Central Government Securities, Treasury Bills : i) supported by the ability to borrow from the Treasury ii) supported by sovereign guarantee or of the State Government iii) supported by the Government of India / State Government in any other manner.

Instruments	Credit risk
Call Money Lending	Low
MIBOR	Low
Central Govt. Securities	Sovereign
State Govt. Securities	Sovereign
Treasury Bills	Sovereign
Trade Bills Rediscounting	Low
Commercial Papers	Low to Medium
Certificate of Deposits	Low
Bonds of PSUs & FIs	Low
Rated Corporate Debentures / Securitised Debt	Low to Medium

The Scheme will seek to underwrite issuance of Government Securities if any, to the extent permitted by SEBI / RBI, subject to the prevailing rules and regulations specified in this respect. The Scheme may also participate in their auction from time to time.

There can be no assurance that the investment objective of the Scheme will be realized. It is, however, emphasized that, there is no risk of default of payment of either principal or interest amount in respect of investments made in Government Securities, Treasury Bills under this Scheme.

The Scheme being open ended, some portion of the portfolio may be invested in Money Market Instruments so as to meet the normal repurchase requirements. The remaining investment will be made in securities which are either expected to be reasonably liquid or of varying maturity. However, the NAV of the Schemes may be affected, if the securities invested in are rendered illiquid after investment.

The Investment Manager targets to identify securities which offer optimum level of yield at lower level of risks. Rated debt instruments in which the Scheme invests will be of investment grade as rated by the credit rating agency. The Investment Manager will be guided by the ratings of Rating Agencies such as CRISIL, CARE, ICRA or any other agency approved by SEBI for this purpose. The Investment Manager may also invest in un-rated securities subject to the provisions and restrictions laid down by SEBI.

In addition, the Investment Manager will monitor the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The Investment Manager would use this analysis to assess the likely direction of interest rates and position the portfolio appropriately to take advantage of the same.

The Scheme, in order to achieve the objectives, will carefully select the debt securities of various maturities and risk profile. Such as Central / State Govt. Securities, Bonds of PSU / FIs, Corporate Debt of both public and private sector undertakings, Certificate of Deposits, Commercial Papers and such other instruments. The securities mentioned above could be listed or un-listed, secured or unsecured, rated or un-rated of varying maturity. The securities may be acquired through IPO, secondary market operations, private placements, rights offer or negotiated deals.

The investments may be made in primary as well as secondary markets. As far as possible, the portfolio will be adequately diversified to reduce the risk of underperformance, arising out of unexpected security-specific factors. The Scheme will also invest in equity and equity related instruments including overseas equity markets such as ADRs / GDRs.

Canara Robeco InDiGo Fund

Investment Focus and strategy:

The Fund Manager would take cues from seasonal patterns of gold, global & domestic macroeconomic events and Government policy & Central Bank actions and decide on the asset allocation between gold & fixed income. The allocations will be within the limits defined in the asset allocation table for each asset class. The Fund

Manager will then create a portfolio of fixed income securities and Gold ETFs after adhering to stringent credit quality and sector limitations. The portfolio will be constructed in a way in which a high level of liquidity is maintained in the portfolio thereby focusing on short to medium term securities, which would also help the fund manager to generate income.

Gold can be a partial hedge against inflation. Gold has seen a favorable development over the years in difficult times for the global economy especially in times of economic turmoil. Instead of providing enhanced yield at the cost of additional duration risk (G-Sec trading) or credit risk (corporate bond exposures), the yields of a low duration fixed income portfolio can be enhanced by investing a limited allocation into gold. With a flexible allocation between fixed income and gold, the Scheme can effectively capture the seasonal patterns in gold and fixed income.

The Scheme will seek to underwrite issuance of Government Securities if any, to the extent permitted by SEBI/RBI, subject to the prevailing rules and regulations specified in this respect. The Scheme may also participate in their auction from time to time. In addition, the Investment Manager will study the macro economic conditions, including political, economic environment and factors affecting liquidity and interest rates. The Investment Manager would use this analysis to assess the likely direction of interest rates and position the portfolio appropriately to take advantage of the same. There can be no assurance that the investment objective of the Scheme will be realised. It is however, emphasized that, there is no risk of default of payment of either principal or interest amount in respect of investments made in Government Securities, Treasury Bills, under the Scheme.

Risk Control Mechanism: (For scheme (s) other than Canara Robeco InDiGo Fund

Since investing requires disciplined risk management, in order to protect the interests of investors, the AMC would incorporate adequate safeguards for controlling risks in the portfolio. As a prudent measure, the AMC has broad internal investment norms and investments made through the scheme would be in accordance with the investment objectives of the schemes and provisions of SEBI Regulations. Where required, scheme specific guidelines are also in place.

Debt Securities

Concentration of risk is mitigated by defining issuer limits. Rigorous in-depth credit evaluation of the issuers will be conducted by the investment team before making investments. As part of credit evaluation, a study on the operating environment, past track record as well as future prospects of the issuer, short as well as long term financial health of the issuer will be carried out. The AMC will be guided by the ratings of accredited agencies such as CRISIL, CARE, ICRA etc. as well as the internal norms for credit exposure

Equity and Equity Related Instruments (Applicable to Canara Robeco Monthly Income Plan)

Investments made by the schemes would be in accordance with the investment objectives of the schemes and provisions of SEBI Regulations. Since investing required disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, the investment team of the AMC will carry out rigorous in-depth analysis of the securities proposed to be invested in.

Securitized Debt

As a risk control measure, the Scheme shall make investment in such Securitized Debts which have a minimum rating of P1+ and/or such other equivalent rating for short term papers or AAA and/or such other equivalent rating for long term papers which suits the risk profile of the Scheme.

The ratings AAA or its equivalent, P1+ or its equivalent assigned to instruments reflects highest degree of safety with regard to timely payment of financial obligations and the + sign reflects comparatively better standing within the category. Investments in these instruments with the highest ratings suit the risk profile of the Scheme

relating to Debt and Money Market Instruments, the same being “Low to Medium”. The investment shall be in those securitized debt instruments which mature on or before the maturity date of the Scheme and the Scheme shall not invest in any Pool of Assets.

Policy relating to Originator(s) – The Scheme shall invest in those Securitised Debt, whose Originator is a Corporate Entity, being a Bank or an NBFC. The Scheme shall invest in the instruments subject to necessary investment limits mentioned under SEBI regulations. Risk may be mitigated by seeking additional credit support (credit enhancement) in order that the instrument(s) may receive the desired level of credit rating. Further, prior to investing in Securitised Debt, it would be ensured that the minimum retention period of the debt and minimum retention percentage by the Originator prior to securitization shall be as prescribed by the RBI guidelines. Any investment in Securitised Debt has to go through an independent credit appraisal process and no special consideration shall be given to whether the Originator has invested in any Scheme(s) of Canara Robeco Mutual Fund

Level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments – The Scheme shall not be investing in any pool of assets. Investment in securitized asset shall only be single loan securitized debt instruments backed by originator as referred above.

Resources and mechanism of individual risk assessment for monitoring investment in securitized debt – Dedicated credit analyst prepares a credit note analyzing the proposal including detailed risk assessment of the underlying. The credit note is recommended by the Head of Fixed income and is approved by the Investment committee. The dedicated credit analyst shall be responsible for timely analyzing the risk and monitoring the performance of such investments made on an ongoing basis and shall report to the investment committee the outstanding position, every quarter.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Risk Control Mechanism For Canara Robeco InDiGo Fund

Debt Securities

The Scheme has a risk management strategy that endeavors to manage risks associated with investing in fixed income & money market instruments. The Scheme has identified various risks pertaining to the scheme including interest rate, credit and liquidity risks and has placed appropriate limit and control structures that are embedded in the investment process to mitigate these risks.

Gold ETFs

The Scheme endeavors to mitigate risks associated with investing in physical gold like risk of loss, damage, theft and natural calamities/human actions by investing in approved Gold ETF/s with appropriate limits for each Gold ETF. These limits and controls are also aimed at minimizing the risks of Impact Costs, Exchange Rate and Liquidity Risks generally associated with Gold ETFs.

Procedure followed for investment decisions:

The Fund Manager of the Scheme (s) are responsible for making buy / sell decisions for the Scheme's portfolio and seeks to develop a well diversified portfolio taking into account the asset allocation patterns of various schemes along with risks that are associated with such investments. The investment decisions are made on an ongoing basis keeping in view the market conditions and other regulatory aspects.

The AMC has constituted an Investment Committee, currently comprising of the CEO, COO, Head of Risk Management, Head of Equities, Head of Fixed Income, which meets at periodic intervals. The Investment Committee’s role is to formulate broad investment strategies for the Scheme, review the performance of the Scheme and the general market outlook.

The Fund Manager is responsible for facilitating investment debate and a robust investment culture. The investment team would hold ongoing meetings, as well as additional ad-hoc meetings as needed, to explore the investment thesis.

It is the responsibility of the AMC to seek to ensure that the investments are made as per the Regulatory guidelines, the investment objective of the Scheme (s) and in the interest of the Unitholders of the Scheme.

The AMC will keep a record of all investment decisions in accordance with the guidelines issued by SEBI.

Portfolio Turnover Policy:

Purchase and Sale of securities attract transaction costs of the nature of brokerage, stamp duty, custodian transaction charges etc. The portfolio turnover is essential to regularly explore trading opportunities to optimise returns for the Scheme and enable portfolio restructuring when required.

The Scheme (s) will be manage its portfolio taking into account the associated risks (such as interest / liquidity / redemption etc.) perceived / expected, so as to minimise the risks by using adequate risk management techniques. The portfolio turnover policy will be aimed at maximising the returns/growth.

The AMC believes in active churning of the portfolio with an aim to encash on the opportunities that present themselves from time to time. However the scheme shall aim to achieve the turnover target of 100% to 150% of the corpus of the Scheme so long as the above target is cost effective and profitable without affecting long-term growth prospects of the investment and scheme objective

In terms of the objective of the scheme, the investments are made in securities having an unexpired maturity in line with the maturity period of the plans. Hence the portfolio turnover will depend upon the outflow on account of any redemptions and also the volatility of interest rates and the scheme aims to maintain a low portfolio turnover ratio.

Pursuant to Schedule IX read with Regulation 50 of the SEBI (Mutual Funds) Regulations, 1996, the cost of investments acquired or purchased shall include all such costs incurred for effecting the transaction while the sale proceeds of investment sold or redeemed shall be net of all such costs incurred for effecting the sale transactions and shall form part of the purchase or the sale value of investments.

Debt and Money Market in India

The Indian debt market is today one of the largest in Asia and includes securities issued by the Government (Central & State Governments), public sector undertakings, other government bodies, financial institutions, banks and corporates. Government and public sector enterprises are the predominant borrowers in the markets. The major players in the Indian debt markets today are banks, financial institutions, mutual funds, insurance companies, primary dealers, trusts, pension funds and corporates. The Indian debt market is the largest segment of the Indian financial markets. The debt market comprises broadly two segments, viz. Government Securities market or G-Sec market and corporate debt market. The latter is further classified as market for PSU bonds and private sector bonds.

The Government Securities (G-Secs) is the oldest and the largest component (60% share in market cap) of the Indian debt market in terms of market capitalization, outstanding securities and trading volumes. The G-Secs market plays a vital role in the Indian economy as it provides the benchmark for determining the level of interest rates in the country through the yields on the Government Securities which are referred to as the risk-free rate of return in any economy. Over the years, there have been new products introduced by the RBI like zero coupon bonds, floating rate bonds, inflation indexed bonds, etc.

The corporate bond market, in the sense of private corporate sector raising debt through public issuance in capital market, is only an insignificant part of the Indian Debt Market. A large part of the issuance in the non-Government debt market is currently on private placement basis.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the

securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). In a predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates. In money market, activity levels of the Government and nongovernment debt vary from time to time. Instruments that comprise a major portion of money market activity include but not limited to:

- Overnight Call
- Collateralised Borrowing & Lending Obligations (CBLO)
- Repo/Reverse Repo Agreement
- Treasury Bills
- Government securities with a residual maturity of < 1 year.
- Commercial Paper
- Certificate of Deposit

Apart from these, there are some other options available for short tenure investments that include MIBOR linked debentures with periodic exit options and other such instruments. Though not strictly classified as Money Market Instruments, PSU / DFI / Corporate paper with a residual maturity of < 1 year, are actively traded and offer a viable investment option.

The market has evolved in past 2-3 years in terms of risk premia attached to different class of issuers. Bank CDs have clearly emerged as popular asset class with increased acceptability in secondary market. PSU banks trade the tightest on the back of comfort from majority government holding. Highly rated manufacturing companies also command premium on account of limited supply. However, there has been increased activity in papers issued by private/foreign banks/NBFCs/companies in high-growth sector due to higher yields offered by them. Even though companies across these sectors might have been rated on a same scale, the difference in the yield on the papers for similar maturities reflects the perception of their respective credit profiles.

The following table gives approximate yields prevailing as on 31st May, 2010 in some of the instruments:

Instrument	Current Yield Range
CBLO	7.16 - 7.28%
Repo	6.25 - 7.35%
3m Tbill	8.13 - 8.18%
1y Tbill	8.24 - 8.29%
10y G Sec	8.37 - 8.44%
3m PSU Bank CD	9.73 - 9.83%
3m NBFC CP	10.02 - 10.17%
3m Manufacturing Co. CP	9.87 - 10.07%
1y PSU Bank CD	10.05 - 10.15%

1y NBFC CP	10.60 - 10.75%
1y Manufacturing Co. CP	10.45 - 10.60%
5y AAA Institutional Bond	9.68 - 9.73%
10y AAA Institutional Bond	9.73 - 9.78%

These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing consequent to changes in macro economic conditions and RBI policy. The price and yield on various debt instruments fluctuate from time to time depending upon the macro economic situation, inflation rate, overall liquidity position, foreign exchange scenario etc. Also, the price and yield vary according to maturity profile, credit risk etc.

Hedging and Derivatives

Applicable to Canara Robeco Income, Canara Robeco Monthly Income Plan, CanaraRobeco Treasury Advantage, Canara Robeco Liquid and CanaraRobeco Gilt (PGS) Schemes:

SEBI vide its circular no. MFD/Cir/011/061/2000 dated 01st February, 2000 permitted mutual funds to participate in derivatives trading subject to observance of the Guidelines issued by SEBI. The Fund shall comply with the prescribed disclosure requirements in this regard. As part of the fund management process, the AMC may use the derivative instruments such as Index futures, Stock futures, Option contracts, Warrants convertible securities, Swap agreements or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with investment objectives of the scheme/s.

Applicable to Canara Robeco Short Term, Canara Robeco Dynamic Bond and Canara Robeco InDiigo Schemes.

Apart from the general permission granted to Mutual Funds by SEBI for participating in derivatives vide its circular no. MFD/Cir/011/061/2000 dated 01st February, 2000, the position limits permitted under regulations as specified in SEBI Cir no. DNPd/Cir-29/2005 dated 14th September, 2005 shall additionally apply to these schemes. However, the scheme specific exposure limits shall be subject to such limits permitted by the Trustees for each scheme.

SEBI vide its circular no. DNPd/Cir-29/2005 dated September 14, 2005 permitted mutual funds to participate in derivatives trading subject to the observance of guidelines issued by SEBI. Mutual Funds are permitted to participate in the derivatives market at par with Foreign Institutional Investors (FII). Accordingly, the mutual funds shall be treated at par with a registered FII in respect of position limit in index futures, index options, stock options and stock futures contracts. The Mutual Fund will be considered as trading members like registered FIIs and the schemes of Mutual Funds will be treated as clients like sub-accounts of FIIs. As a part of the fund management process, the AMC may use appropriate derivative instruments in accordance with the investment objectives of the Scheme.

The following are the position limits for Mutual Funds and its schemes :

i. Position limit for Mutual Funds in index options contracts

- a. The Mutual Fund position limit in all index options contracts on a particular underlying index shall be Rs. 250 crore or 15% of the total open interest of the market in index options, whichever is higher, per Stock Exchange.
- b. This limit would be applicable on open positions in all options contracts on a particular underlying index.

ii. Position limit for Mutual Funds in index futures contracts:

- a. The Mutual Fund position limit in all index futures contracts on a particular underlying index shall be Rs. 250 crore or 15% of the total open interest of the market in index futures, whichever is higher per Stock Exchange.
- b. This limit would be applicable on open positions in all futures contracts on a particular underlying index.

iii. Additional position limit for hedging

In addition to the position limits at point (i) and (ii) above, Mutual Funds may take exposure in equity index derivatives subject to the following limits:

1. Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.
2. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.

iv. Position limit for Mutual Funds for stock based derivative contracts

The Mutual Fund position limit in a derivative contract on a particular underlying stock, i.e. stock option contracts and stock futures contracts, stand in the following manner:

1. For stocks in which the market wide position limit is less than or equal to Rs. 250 crore, the Mutual Fund position limit in such stock shall be 20% of the market wide position limit.
2. For stocks in which the market wide position limit is greater than Rs.250 crore, the Mutual Fund position limit in such stock shall be Rs.50 crore.

v. Position limit for each scheme of a Mutual Fund

The position limits for each scheme of mutual fund and disclosure requirements shall be identical to that prescribed for sub account of a FII. Therefore, the scheme-wise position limit/ disclosure requirements shall be:

- i. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of: 1% of the free float market capitalisation (in terms of number of shares) or 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts).
- ii. This position limits shall be applicable on the combined position in all derivative contracts on underlying stock at a Stock Exchange.
- iii. For index based contracts, Mutual Funds disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

Monitoring of Position Limits

- a. The Mutual Fund shall notify Clearing Member/s for each scheme, through whom it would clear its derivative contracts, to the Stock Exchange.
- b. The Stock Exchange would then assign a unique client code to each scheme of the Mutual Fund.
- c. The Stock Exchange shall monitor the scheme-wise position limits in the manner similar to that prescribed for FIIs and their sub-accounts in SEBI circular no. SMD/DC/Cir/-11/02 dated February 12, 2002 as modified from time to time.

The Fund shall comply with the guidelines issued by SEBI and amendments thereof issued from time to time in derivative trading.

Applicable to all schemes

Equity / Equity Related Derivative Instruments :

Index futures are meant to be an efficient way of buying / selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. Index futures can be an efficient way of achieving the Scheme's investment objective. Index futures may avoid the need for tracking in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the scrips. Index futures can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares of an index and will be easy to settle compared to physical portfolio of shares representing an index.

Stock futures could also be used as an alternative to investing in particular stocks comprising an index where either the liquidity is low or the impact cost is high.

Basic Structure of an Index Future

Index Futures are instruments designed to give exposure to the equity market indices. The Stock Exchange, Mumbai and the National Stock Exchange of India Limited have started trading in index futures. The pricing of an index future is the function of the underlying index and short-term interest rates.

Illustration :

Spot Index : 1070

1 month Nifty Future Price on day 1 : 1075

Fund buys 100 lots

Each lot has a nominal value equivalent to 200 units of the underlying index.

Let us say that on the date of settlement, the future price = Closing spot price = 1085

Profits of the Fund = $(1085-1075) * 100 \text{ lots} * 200 = \text{Rs.}200,000$.

Similarly, the fund can suffer a loss if the future price is lower than the contracted price . Let us say that in the above example, on the date of

settlement the future price = Closing Spot Price = 1060.

Loss for the Fund = $(1060-1075) * 100 \text{ lots} * 200 = (\text{Rs.}300,000)$

Please note that the above example is given for illustration purposes only.

The net impact for the Fund will be in terms of the difference between the closing price of the index and cost price (ignoring margins for the sake of simplicity) plus interest costs on funds that would otherwise be invested in stocks comprising the index. The risks associated with index futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and/or mispricing of the future at any time during the life of the contract.

Strategy Number No. 1

Using Index Future to increase percentage investment in equities.

The strategy will be used for the purpose of generating returns on idle cash, pending its investment in equities. The Scheme is open ended in nature and subject to daily inflows. There may be a time lag between the inflow of funds and their deployment in equities. If so desired, the AMC would be able to take immediate exposure to equities via index futures. The position in index futures may be reversed in a phased manner, as the funds are deployed in the equity markets.

Example :

The scheme has a corpus of Rs. 50 crores and there is an inflow of Rs. 5 crore in a day. The AMC may buy index futures contracts of a value of Rs. 5 crore. Later as the money is deployed in the underlying equities, the value of the index futures contracts can be suitably reduced.

Portfolio	Event	Equity Portfolio Gain(Loss) Rs. in Crs.	Derivative Gain (Loss) Rs. in Crs.	Total Portfolio Gain / (Loss) Rs. in Crs
Rs.50 Crore Equity exposure	10% rise in equity	5	NIL	5
Rs. 50 Crore exposure + Rs. 5 Crore long position index futures	10% rise in Equity Price	5	0.5	5.5
Rs.50 crore Equity exposure	10% fall in Equity price	(5)	Nil	(5)
Rs.50 crore Equity exposure + Rs 5 crore long position index futures	10% fall in equity price	(5)	(0.5)	(5.5)

RISKS

The strategy of taking a long position in index futures increases the exposure to the market. The long position is positively correlated with the market. However, there is no assurance that the stocks in the portfolio and the index behave in the same manner and thus this strategy may not be provide gains perfectly aligned to the movement in the index.

The long position will have as much loss as a gain in the underlying index, e.g. if the index appreciates by 10%, the future value rises by 10%. However, this is true only for futures contracts held till maturity. In the event that a futures contract is closed out before its expiry, the quoted price of the futures contract may be different from the gain/loss due to the movement of the underlying index. This is called the basis risk.

While futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time, for the Scheme to purchase or close out a specific futures contract.

Similarly, the fund can use stock futures to reduce the cost of holding in the following manner:

When stock futures are trading at a discount then the fund can buy stock in futures market instead of buying in the cash market. On expiry of the contract, both prices (spot and future) have to align. On expiry or as and when stocks start trading at a premium in the futures market the transaction can be reversed by selling the stock in futures and buying in the cash market.

Fund can take advantage of arbitrage opportunities in the futures markets to reduce cost of holding. If stock futures are trading at a discount then the fund can sell its existing holding in cash market and buy in the futures market. The cash realised will earn interest while the overall cost of the holding stock will also come down. On expiry of contract both prices (spot and futures) have to align. On expiry or as and when the stock starts trading at a premium in the futures market, the transaction can be reversed by selling the stock in the futures and buying in the cash markets.

Strategy Number 2

Using Index Futures to decrease percentage investment in equities

Similarly, in the case of a pending outflow of funds where a negative view is taken on the market, the Fund, in order to reduce exposure in equities may 'sell the index forward' by taking a short position in Index Futures. This position can be unwound over a period of time simultaneously selling the equity shares from the investment portfolio of the Scheme. The strategy of taking a short position in the index future is a hedging strategy and reduces the market risk and volatility of the portfolio. However, if the value of the index future rises, then, the fund would be adversely affected due to its short position in index futures.

Example: Assume that a scheme has an equity exposure of Rs. 100 crore. If the Fund Manager wishes to reduce the equity exposure to Rs. 50 crore for a short time, he should sell index futures contracts of Rs. 50 crore.

Portfolio	Event	Equity Portfolio Gain/(Loss) (Rs. In crore)	Derivatives Gain/(Loss) (Rs. In crore)	Total portfolio Gain/(Loss) (Rs. In crore)
Without Hedge Rs.100 crore equity Exposure	10 % fall in equity price	(10)	NIL	(10)
With Hedge Rs.100 crore equity Exposure	10 % fall in equity prices	(10)	5	(5)
Without Hedge Rs.100 crore equity Exposure	10 % rise in equity prices	10	NIL	10
With Hedge Rs.100 crore equity Exposure	10 % rise in equity prices	10	(5)	5

50% Hedge – contract value of Rs. 50 crore

The above example demonstrates that the Fund would benefit from the hedged position if the index future moves in the direction as expected by the Fund Manager. Similarly, the Fund would be adversely affected from the hedged position if the index does not move in the direction expected by the Fund Manager.

RISKS

- The strategy of taking a short position in index futures is a hedging strategy and reduces the market risk. The short position is negatively correlated with the market. However, there is no assurance that the stocks in the portfolio and index behave in the same manner and thus this strategy may not be a perfect hedge.
- The short position will have as much loss as a gain in the underlying index. e.g. if the index appreciates by 10%, the future value falls by 10%. However, this is true only for futures contract held till maturity. In the event that a futures contract is closed out before its expiry, the quoted price of the futures contract may be different from the gain/loss due to the movement of the underlying index. This is called the basis risk.
- While futures markets are more liquid, there can be no assurance that ready liquidity would exist at all points in time, for the Scheme to purchase or close out a specific future contract.

Strategy Number 3

• Portfolio Protection Using Index Put

The purchase of an index put option gives the scheme the option of selling the index to the writer of the put at a predetermined level of the index, called the strike price. If the index falls below this level, the scheme benefits from the rise in the value of the put option.

Similarly, as a stock hedging strategy, the purchase of a put option on the underlying stock would give the scheme the option to sell the stock to the writer of the option at the predetermined strike price. This would lead to a capping of the loss in value of a stock.

Example: Let us assume a scheme with a corpus of Rs. 100 crore. Let us also assume an index of 100. The scheme is fully invested (Rs. 100 crore in equities). The scheme purchases a put option on the index with a strike price of 95 for an assumed cost of Rs. 1 crore. The following table illustrates the portfolio returns:

% change in Index	Index Value	Equity Portfolio Value Rs. In crore A	Option Value Rs. In crore B	Cost of the Put Option Rs. In crore C	Portfolio Value Rs. In Crore (A+B+C)	% returns from portfolio
10	110	110	0	(1)	109	9
5	105	105	0	(1)	104	4
(5)	95	95	0	(1)	94	(6)
(10)	90	90	5	(1)	94	(6)

(15)	85	85	10	(1)	94	(6)
------	----	----	----	-----	----	-----

A similar put option can be purchased on any individual stock and the downside can be capped.

RISKS

- The table shows that the portfolio value will not fall below Rs. 94 crore, while the scheme benefits from any increase in stock prices. The table assumes perfect correlation between the equity portfolio and the index. However this may not be the case. Therefore, the minimum portfolio value cannot be assured, but the loss is expected to be lower in a portfolio with a put option on the index, as compared to a normal portfolio.
- The put option would lead to a gain based on the difference between the strike price and the index level at expiration date, if positive. However, in case the option is reversed before the expiration date, the market price received on the sale of the option may be different from the price calculated.
- While liquidity exists in options markets, there can be no assurance that the ready liquidity would exist at all points in time, for the scheme to purchase or close out a specific options contracts.
- In the case of purchase of a stock put, the strategy is a perfect hedge on the expiration date of the put option. On other days, there may be (temporary) imperfect correlation between the share price and the put option, which can potentially take the stock value below the minimum under the hedge.

Similarly, the Fund can use stock futures to reduce the cost of holding in the following manner:

- When stock futures are trading at a discount then the fund can buy in futures market instead of buying in the cash market. On expiry of the contract, both prices (spot and futures) have to align. On expiry or as and when stocks starts trading at a premium in the futures market, the transaction can be reversed by selling the stock in futures and buying in the cash market.
- Fund can take advantage of arbitrage opportunities in the futures markets to reduce cost of holding. If stock futures are trading at a discount then the fund can sell its existing holding in cash market and buy in futures market. The cash realised will earn interest while the overall cost of holding stock will also come down. On expiry of contract both prices (spot and futures) have to align. On expiry or as and when the stock starts trading at a premium in the futures market, the transaction can be reversed by selling the stock in the futures and buying in the cash markets.

Advantages of Equity Derivatives :

In times of volatility in the equity markets, derivatives provide much needed flexibility to hedge against this volatility. Some of the advantages of specific derivatives products are given below:

- Stock Index Futures can give exposure to the index. Appreciation in Index Investment in Stock Index Futures can give exposure to the index without directly buying the individual stocks, which make up the index. Appreciation in Index stocks can be effectively captured through investment in Stock Index Futures.
- The Scheme can sell futures to hedge against market movements without actually selling the underlying stocks it hold.
- By buying call options on the index, one can participate in the rise in the market, without actually buying individual stocks.
- By buying put options on the index, the Scheme can insulate the portfolio (assuming a perfect co-relation between portfolio and index which may not be the case) from the downside risk at a small cost.

Debt / Debt Related Derivatives

The Scheme may use derivatives in accordance with SEBI Regulations. RBI has issued guidelines on Interest Rate Swaps (IRS) and Forward Rate Agreements (FRA) on July 7, 1999. These products were introduced for developing the nation's Debt Market.

Interest Rates Swaps (IRS)

All swaps are financial contracts, which involve exchange (swap) of a set of payments receivable by one party for another set of payments receivable by another party, usually through an intermediary. An IRS can be defined as a contract between two parties (Counter Parties) to exchange, on particular dates in the future, one series of cash flows (fixed interest) for another series of cash flows (variable or floating interest) in the same currency and on the same principal for an agreed period of time. The exchange of cash flows need not occur on the same date.

Forward Rate Agreements (FRA)

A FRA is an agreement between two counter parties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date, based on a notional amount, for an agreed period. In short, in a FRA, interest rate is fixed now for a future period. The special feature of FRAs is that the only payment is the difference between the FRA rate and the Reference rate and hence are single settlement contracts. As in the case of IRS, notional amounts are not exchanged.

The Scheme will use derivative instruments for the purpose of hedging and portfolio balancing. Hedging does not mean maximisation of returns but only reduction of systematic or market risk inherent in the investment.

Basic Structure of an Interest Rate Swap

An interest rate swap is an agreement between two parties to exchange future payment streams based on a notional amount. Only the interest on the notional amount is swapped, and principal amount is never exchanged.

In a typical interest rate swap, one party agrees to pay a fixed rate over the term of the agreement and to receive a variable or floating rate of interest. The counterparty receives a stream of fixed rate payments at regular intervals as described in the agreement and pays the floating rate of interest.

Illustration :

Fixed interest rate : 10% p.a.

Variable Interest Rate : Over-Night MIBOR (variable)

Notional Principal : Rs.10 crore

Period of Agreement : 1 year

Interest Frequency : Semi-annual

Suppose six month period from the value date of swap to the first payment date is 182 days and the daily compounded over-night MIBOR is say 8% p.a. on that date, the interest streams are as follows :

Fixed Rate Payment :

$Rs.10,00,00,000.00 \times 182 \times 10 / 365 \times 100 = Rs.49,86,301.36$

Variable Rate :

$Rs.10,00,00,000.00 \times 182 \times 8 / 365 \times 100 = Rs.39,89,041.09$

In the above example, the fixed rate payer will pay the variable rate payer a net amount of Rs.9,97,260.27 (Rs.49,86,301.36 - 39,89,041.09).

Likewise the second and final payment will depend upon the variable NSE MIBOR for the remaining 183 days and the interest stream of fixed rate for the said period, the difference of which, will be settled between the parties at the expiry of the contract.

The above example illustrates the benefits and risks of using derivatives for hedging and optimising the investment portfolio. Swaps have its own drawbacks like credit risk, settlement risk. However, these risks are substantially reduced as the amount involved is interest streams and not principal.

Valuation of Derivative Products

The traded derivatives shall be valued at market price in conformity with the stipulations of sub clauses (i) to (v) of clause 1 of the Eighth Schedule to the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996.

The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996.

Exposure to Derivatives

Losses may arise as a result of using derivatives, but these are likely to be compensated by the gains on the underlying cash instruments held by the Scheme.

Risk associated with Derivatives trading :

The risk associated with index futures is similar to the one with equity investments. Additional risks could be on account of illiquidity and hence mispricing of the futures at the time of purchase. As and when the Scheme trades in the derivatives markets, there are risk factors and issues concerning the use of derivatives. Derivative products are specialised instruments that require investment techniques and risk analyses different from those associated with stocks. The use of a derivative requires understanding of the underlying instrument as well as that of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess risk that a derivative adds to the portfolio and the ability to forecast price movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks associated with trading in derivatives include the risks of mispricing or improper valuation of derivatives and inability of derivatives to correlate perfectly with underlying assets, indices.

The net impact for the Scheme will be in terms of the difference between the closing price of the index and cost price (ignoring margins for the sake of simplicity). Thus, profit or loss for the Scheme will be the difference between the closing price (which can be higher or lower than the purchase price) and the purchase price.

F. FUNDAMENTAL ATTRIBUTES

1. Type of Scheme

Kindly refer to the Section "Information about the Scheme on page no.18 of this Scheme Information Document"

2. What is the investment objective of the scheme (s)?

- Investment objective: Kindly refer to the Section "Information about the Scheme on page no18 & 19 of this Scheme Information Document".
- Investment pattern: Kindly refer to the Section "Information about the Scheme on page no19 to 23 of this Scheme Information Document"

3. Terms of Issue

A. Listing

As the repurchase facility is provided on an ongoing basis, at NAV related prices, the units of the Scheme/s are not going to be listed on any Stock Exchanges.

B. Repurchase

a) How to Repurchase:

The repurchase requests can be made on the forms available at the Sales Offices of the AMC (refer last page for the list of offices) or by submitting the duly discharged Statement of Account.

AMC shall pay the redemption or repurchase proceeds within 10 working days. If AMC fails to refund the amount within the stipulated time, interest as specified by SEBI (currently 15% p.a.) will be paid to the investors from the expiry of 10 days till the date of dispatch of the said redemption or repurchase proceeds.

b) Applicable Rate for Repurchase of Units:

In respect of valid applications received upto 3 p.m. by the Mutual Fund, same day's closing NAV shall be applicable.

In respect of valid applications received after 3 p.m. by the Mutual Fund, the closing NAV of the next business day shall be applicable.

Calculation of Repurchase Price: The exit load will be subtracted as a percentage of Net Assets Value (NAV) i.e. applicable loads as a percentage of NAV will be subtracted from NAV to calculate Repurchase Price. The formula for calculation of Repurchase Price would be:

Repurchase Price = Applicable NAV x (1-Exit Load, if any)

e.g. if the applicable NAV is Rs.10.00 and repurchase / exit load is 1.00%, then the Repurchase Price will be Rs.9.9000.

Please Note that exit load will be applicable as per the respective plans.

If units are held jointly, redemption/ repurchase requests shall be signed by all the joint holders and the proceeds of the repurchase/redemption will be paid to the first holder. In the event of the death of the first named holder, survivor/s will have to make the repurchase/redemption requests, duly signed by him/them along with the attested copy of the death certificates and the proceeds of the repurchase/redemption will be paid to him/them.

However, if the unit holding is specified as 'Anyone or Survivor', any one of the unit holders will be entitled to make redemption/repurchase requests, without the need for the other unit holders to sign.

The Unit holder may either request for mailing of the redemption proceeds to his/her address or collection of the same from the Sales Offices of the AMC (Investor Relations Centre), where it was deposited for repurchase.

The repurchase warrant, under normal circumstances, will be dispatched within the statutory time limit of 10 working days from the date of the receipt of the repurchase / redemption requests.

Name of the centers where redemption can be effected is furnished on the last page of this document.

In accordance with SEBI (MF) Regulations, 1996, the repurchase price will not be lower than 93 per cent of the Net Asset Value and the sale price is not higher than 107 per cent of the Net Asset Value, and that the difference between the repurchase price and the sale price shall not exceed 7% calculated on the sale price.

c) Right to Limit Repurchase:

In an open ended Scheme, any disruption in the normal functioning of the markets for Equity / Call Money Market or extreme illiquidity in any of the investments held by the Scheme may affect the ability of the Fund Manager to buy or sell freely in the market. The Scheme/s strives to maintain an adequate and desirable level of liquidity.

Procedure followed for limiting repurchase:

Trustees shall approve the limits for repurchase which shall be intimated to SEBI and shall be notified to all the unitholders by publishing the same in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated.

In the event of a large number of repurchase requests, the time taken by the Scheme/s for the repurchase may become significant.

C. Aggregate fees and expenses charged to the scheme

a) AMC Fees: For management of the Scheme, the Investment Manager will charge a fee not exceeding 1.25% of the average daily net assets of the Scheme. In future, the Investment Manager may modify the fee within the limits specified in the Regulations and disclosed in the SID.

b) Trusteeship Fees: The Trustees shall be entitled to charge a trusteeship fee of 0.05% of the Net Assets of the Scheme, to meet the expenses and contingencies.

c) New fund offer expenses:

As the fund offer is on a continuous basis, there are no new fund offer expenses.

d) Annual Scheme Recurring Expenses:

Please refer to section “Fees & Expenses” on Page No 69 to 71 for details

G. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Scheme Name	Benchmark
Canara Robeco Liquid	Crisil Liquid Fund Index
Canara Robeco Treasury Advantage Fund	Crisil Liquid Fund Index
Canara Robeco Floating Rate	Crisil Liquid Fund Index
Canara Robeco Dynamic Bond Fund	Crisil Composite Bond Fund Index
Canara Robeco Short Term Fund	Crisil Liquid Fund Index
Canara Robeco Gilt PGS	I-Sec Li-Bex
Canara Robeco Income	Crisil Composite Bond Fund Index
Canara Robeco Monthly Income Plan	Crisil MIPBlended Index
Canara Robeco InDiGo Fund	Canara Robeco Blended Gold Index*

* Canara Robeco Blended Gold Index is a composite index of the Gold Index and CRISIL Short term Bond Fund Index computed by CRISIL Limited for the purpose of benchmarking the performance of Canara Robeco InDiGo Fund. The Index shall not be copied, transmitted or distributed for any commercial use. CRISIL has taken due care and caution in computation of the Index, based on the data obtained from sources which it considers reliable and is as per the valuation method prescribed by SEBI for the purpose of computation of the Index.

However, CRISIL does not guarantee the accuracy, adequacy or completeness of the said data / Index and is not responsible for any errors or for the results obtained from the use of the said data/ Index . CRISIL especially states that it has no financial liability whatsoever to the users of the Index.

As approved by the Board of Directors/Trustees the Schemes have currently selected the above mentioned benchmark for respective scheme (s) on the basis of the Investment Pattern/Objective of the Scheme (s) and the composition of the Index. Any change in the Benchmark Index for the fund would be actuated only post approval from Board of Directors/Trustees.

H. WHO MANAGES THE SCHEME?

Name of the Fund Manager	Age	Qualification	Experience (Years)	Funds Managed
Mr. Ritesh Jain	35	B.Com; Masters in Business Economics	12	Canara Robeco Income Fund, Canara Robeco Gilt PGS and Canara Robeco InDiGo Fund, Canara Robeco Yield Advantage Fund and Canara Robeco Monthly Income Plan
Ms. Suman Prasad	36	PGDMS(Finance)	13	Canara Robeco Dynamic Bond Fund , Canara Robeco Treasury Advantage Fund and Canara Robeco Gilt, Canara Robeco Short Term Fund, Canara Robeco Liquid, Canara Robeco Floating Rate, Canara Robeco Liquid, Canara Robeco Floating Rate, Canara Robeco Gilt Advantage Fund ,Canara Robeco Fixed Maturity Plan – Series 6 and Canara Robeco Interval Scheme – Series 2
Mr. Akhil Mittal	30	B.Com, MBA (Finance)	7	Canara Robeco Dynamic Bond Fund , Canara Robeco Treasury Advantage Fund and Canara Robeco Gilt, Canara Robeco Short Term Fund, Canara Robeco Liquid, Canara Robeco Floating Rate, Canara Robeco Liquid

I. WHAT ARE THE INVESTMENT RESTRICTIONS?

Pursuant to the "SEBI Regulations", the following investment and other limitations are presently applicable to the Scheme, as the case maybe:

1. The Scheme shall buy and sell securities on the basis of deliveries and shall in all cases of purchases, take delivery of relative securities and in all cases of sale, deliver the securities provided that a mutual fund may engage in short selling of securities in accordance with the frame work relating to short selling and securities lending and

borrowing specified by the board. Provided further that the mutual fund may enter into derivatives transactions in a recognised stock exchange, in accordance with the guidelines issued by the Board. Provided further that the sale of government securities already contracted for purchase shall be permitted in accordance with the guidelines issued by the Reserve Bank of India in this regard.

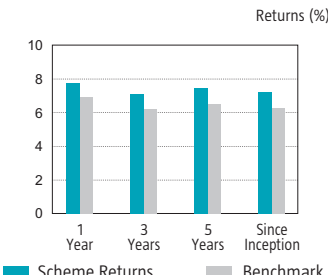

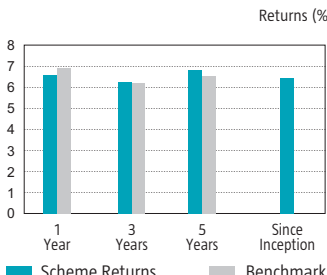

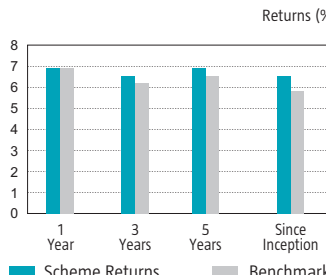

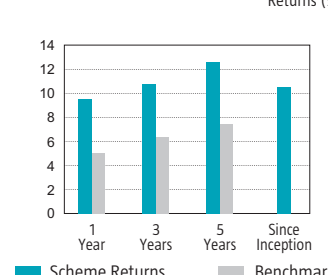

2. The securities purchased by the Fund shall be got transferred in the name of the Mutual Fund on account of the concerned Scheme, wherever investments are intended to be of long term nature.
3. The Scheme shall not invest more than 15% of its NAV in debt instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorized to carry out such activity under the Act. Such investment limit may be extended to 20% of the NAV of the Scheme with the prior approval of the Board of Trustees and the Board of Asset Management Company, provided that such limit shall not be applicable for investments in Government Securities.

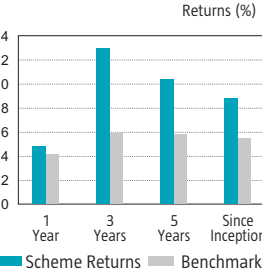

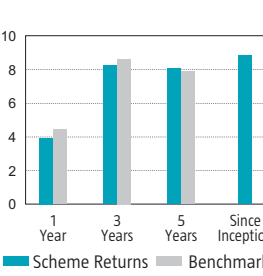

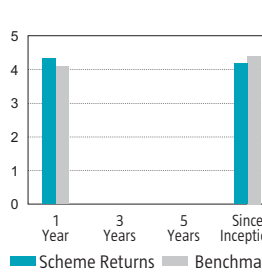

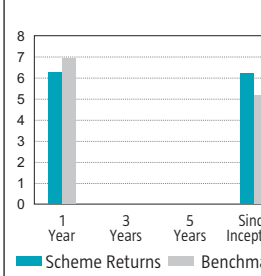

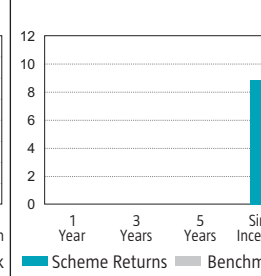

The investment within the limit can be made in mortgaged backed securitized debt which are not reted below the investment grade by credit rating agency registered with SEBI..

4. The Scheme shall not invest more than 10% of its NAV in unrated debt instruments issued by a single issuer and the total investment in such instruments shall not exceed 25% of NAV of the Scheme. All such investments shall be made with the prior approval of the Board of Trustees and the Board of Asset Management Company.
5. The Scheme shall not invest more than thirty percent of its net assets in money market instruments of an issuer. Provided that such limit shall not be applicable for investments in Government securities, treasury bills and collateralized borrowing and lending obligations.
6. The Mutual Fund under all its Scheme(s) will not own more than ten percent of any Company's paid up capital carrying voting rights.
7. The Scheme shall not advance any loan for any purpose.
8. The Scheme shall not park more than 15% of the net assets in Short term deposit(s) of all the scheduled commercial banks put together. However, it may be raised to 20% with prior approval of the trustees. Also, parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the mutual fund in short term deposit (will not apply to term deposits placed as margins for trading in cash and derivatives market)
9. No mutual fund scheme shall invest more than 10 per cent of its NAV in the equity shares or equity related instruments of any company
10. The scheme shall not invest more than 5% of its NAV in the unlisted equity shares or equity related instruments in case of open ended scheme.
11. Investment in other Schemes : The investment by this Scheme in other Mutual Fund Schemes will be in accordance with Regulation 44(1) read with Clause 4 of the VII Schedule to the SEBI (Mutual Funds) Regulations, 1996 according to which :
 - The Scheme/s may invest in another scheme under the same asset management company or in any other mutual fund without charging any fees, provided the aggregate inter scheme investments made by all the Schemes under the same management or in schemes under the management of any other AMC shall not exceed 5% of NAV of the mutual fund.
 - The Scheme/s shall not make any investment in any fund of fund scheme
12. The Scheme/s shall not make any investment in:
 - Any unlisted security of an associate or group company of the sponsor; or
 - Any security issued by way of private placement by an associate or group company of the sponsor; or

- The listed securities of group companies of the sponsor which is in excess of 25% of the net assets.
13. The Fund shall not borrow except to meet temporary liquidity needs of the Fund for the purpose of redemption of units or payment of interest and dividend to the unit holders, provided that the fund shall not borrow more than 20% of the net assets of the individual scheme and the duration of the borrowing shall not exceed a period of 6 months.
 14. The AMC may invest in the Scheme either in the initial offer or subsequently. However, it shall not charge any investment management fee on such amounts invested by it.
 15. Transfers of investments from one scheme to another scheme in the same mutual fund shall be allowed only if, -
 - Such transfers are done at the prevailing market price for quoted instruments on spot basis. [Explanation - "spot basis" shall have same meaning as specified by stock exchange for spot transactions.]
 - The securities so transferred shall be in conformity with the investment objective of the Scheme to which such transfer has been made.
 16. The cumulative gross exposure through equity/equity related instruments, debt and derivative position shall not exceed 100% of the net assets of the scheme/s and the total exposure to option premium paid shall not exceed 20% of the net assets of the Scheme/s. Other provisions as contained in SEBI circular no CIR/MFD/DF/11/2010 dated 18th August 2010 shall also be complied with.
 17. All investment restrictions stated above shall be applicable at the time of making investment.

The Trustees of the Mutual Fund may alter these limitations / objectives from time to time to the extent the SEBI Regulations change so as to permit the Scheme/s to make its investments in the full spectrum of permitted investments for the mutual fund in order to achieve its investment objectives. All investments of the Scheme will be made in accordance with the SEBI Regulations, including Seventh Schedule thereof.

In case of In Canara Robeco Monthly Income Plan in dividend option, If the investor does not clearly specify the choice of Monthly Dividend option / Quarterly Dividend option, it will be treated as a Monthly Dividend option.

2. Minimum Amount for Purchase/ Redemption/ Switches

Kindly refer to the section "Scheme Summary" mentioned on page no 3 to 6 in this Scheme Information Document

3. Micro Systematic Investment Plan (SIP) (Micro SIP)

Systematic Investment Plans (SIPs) where aggregate of installments in a rolling 12 month period or in a financial year i.e. April to March does not exceed Rs. 50,000 (hereinafter referred as "Micro SIP") shall be exempt from the requirement of PAN on submission of a photocopy of any one of the Photo Identification document.

This exemption will be applicable only to investments by individuals (including Joint Holders who are individuals, NRIs but not PIOs), Minors and Sole proprietary firms. HUFs and other categories will not be eligible for the exemption.

Eligible Investors (including joint holders) should submit a photocopy of any one of the (current and valid) Photo Identification documents [self-attested by the investor / attested by the ARN Holder/AMFI registered Distributor mentioning the ARN number] along with Micro SIP applications as proof of identification. The list of acceptable Photo Identification documents is given in the Micro SIP Enrolment Form. Investors who wish to enroll for Micro SIP are required to fill in the Micro SIP Enrolment Form available with the ISCs, distributors and agents.

All terms and conditions of Systematic Investment Plans (SIPs) shall apply to Micro SIPs. The Trustees reserve the right to change/modify the terms and conditions of Micro SIPs at a later date on a prospective basis.

4. Systematic Investment Plan (SIP) (Applicable for Canara Robeco Treasury Advantage Fund, Canara Robeco Monthly Income Plan, Canara Robeco InDiGo Fund, Canara Robeco Income, Canara Robeco Gilt PGS, Canara Robeco Floating Rate)

Systematic Investment Plan is a simple and time honoured investment strategy aiding disciplined investing over a period of time. The Investment option enables investors to transfer a fixed sum of money in a particular scheme at regular intervals to another scheme.

Investors / Unit holders may enroll for SIP Auto Debit facility through Electronic Clearing Service (Debit Clearing) of the Reserve Bank of India or for SIP Direct Debit Facility / Standing Instruction Facility available with specified Bank(s)/ Branch(s). In order to enroll for SIP Auto Debit facility or Direct Debit Facility or Standing Instruction, an investor must fill-up the SIP Enrolment Form (for investment through Auto-Debit / ECS /Standing Instruction).

The features of Systematic Investment Plan are as under:

<u>Monthly SIP</u> Minimum amount per SIP instalment	Rs. 1,000.00 and multiple of Re. 1.00 thereafter.
<u>Quarterly SIP</u> Minimum amount per SIP instalment	Rs. 2,000.00 and multiple of Re. 1.00 thereafter.
No. of SIP Instalments a) Minimum b) Maximum	Six instalments No Limit
Dates of post dated Cheques /Auto Debit Facility through Electronic Clearing Service(ECS) of RBI or Direct debit facility with specified Bank(s)	01 st or 5 th or 15 th or 20 th or 25 th of every month /quarter (In case, the date fixed happens to be a holiday / non-business day, the cheques shall be deposited / ECS/Auto Debit Facility will be effected on the next business day.
Applicable NAV and Cut-off time	Applicable NAV and cut-off time as prescribed under the Regulation shall be applicable..
Notice Period	Investors are given option to discontinue SIP by giving 15 days notice prior to the due date of the next instalment.

5. **Systematic Transfer Plan (STP):** (Applicable for Canara Robeco Treasury Advantage Fund, Canara Robeco Monthly Income Plan, Canara Robeco InDiGo Fund, Canara Robeco Income, Canara Robeco Gilt PGS, Canara Robeco Floating Rate)

STP is a facility wherein a unit holder of a Canara Robeco Mutual Fund scheme can opt to transfer a fixed amount or capital appreciation amount at regular intervals to another scheme of Canara Robeco Mutual Fund. The amount transferred under the STP from the Transferor scheme to the Transferee scheme, shall be affected by redeeming units of Transferor scheme and subscribing to the units of the Transferee scheme.

The features of Systematic Transfer Plan are as under:

Monthly STP Minimum amount per STP instalment	Rs. 1,000.00 and multiple of Re. 1.00 thereafter.
Quarterly STP Minimum amount per STP instalment	Rs. 2,000.00 and multiple of Re. 1.00 thereafter.
No. of STP Instalments c) Minimum d) Maximum	Six instalments No Limit
Periodicity	Monthly/Quarterly
Dates available for STP Facility	01st or 5th or 15th or 20th or 25th of every month /quarter. (In case, the date fixed happens to be a holiday / non business day, the cheques shall be deposited / Auto Debit Facility will be affected on the next business day.)
Applicable NAV and Cut-off time	Applicable NAV and cut-off time as prescribed under the Regulation shall be applicable.
Notice Period	Investors are given option to discontinue STP by giving 15 days notice prior to the due date of the next instalment.

6. **Systematic Withdrawal Plan (SWP):** Applicable for Canara Robeco Treasury Advantage Fund, Canara Robeco Liquid, Canara Robeco Monthly Income Plan, Canara Robeco InDiGo Fund, Canara Robeco Income, Canara Robeco Gilt PGS, Canara Robeco Floating Rate Fund)

Investors can use the SWP facility for regular inflows. Withdrawals can be made by informing the AMC or Registrar of the specified withdrawal dates and minimum amount as per the table below. The amount will be converted into units at the applicable repurchase price on that date and will be subtracted from the units with the unit holder. The AMC may close a unit holder's account if the balance falls below the specified minimum amount for the scheme. Unit holders may change the amount indicated in the SWP, subject to the minimum amount specified. The SWP may be terminated on written notice from the unit holder and it will terminate automatically when all the units of the unit holder are liquidated or withdrawn from the account.

The features of Systematic Withdrawal Plan (SWP) are as under:

Quarterly SWP:- Minimum amount per SWP instalment	Rs. 1,000.00 and multiple of Re. 1.00 thereafter.
Quarterly SWP:- Minimum amount per SWP instalment	Rs. 2,000.00 and multiple of Re. 1.00 thereafter.
Periodicity	Monthly/Quarterly
Dates available for SWP Facility	01 st or 5 th or 15 th or 20 th or 25 th of every month /quarter. (In case, the date fixed happens to be a holiday / non business day, the cheques shall be deposited / Auto Debit Facility will be affected on the next business day.)
Applicable NAV and Cut-off time	Applicable NAV and cut-off time as prescribed under the Regulation shall be applicable.
Notice Period	Investors are given option to discontinue SWP by giving 15 days notice prior to the due date of the next instalment.

7. Dividend Policy

The Scheme/s may distribute, surplus if any, by way of dividend/ fully paid bonus units, as may be decided by the Trustees from time to time. **If there is no distributable surplus or surplus amount is too small for distribution, in the opinion of the Trustees, the Dividend/Bonus declaration may not take place. The Scheme is not assuring or guaranteeing any dividend or returns.**

Income Distribution, if declared, warrants will be issued within 30 days from the date of declaration of Income Distribution or such period that may be stipulated from time to time. The Income Distribution will be paid out of the net surplus of the Scheme, to those unit holders whose names appear in the register of unit holders on the record date to be notified for the purpose.

Dividend Reinvestment

The unit holders have the option to reinvest the Dividend declared by the Scheme/s. Such unit holders opting to reinvest the dividend receivable by them shall invest in additional units of the Scheme/s. Upon exercising such option, the dividend due and payable to the unit holders will be compulsorily and without any further act by the unit holders reinvested in the Scheme/s.

The dividends so reinvested shall be constructive payment of dividends to the unit holders and constructive receipt of the same amount from each unit holder, for reinvestment in units.

On reinvestment of dividends, the number of units to the credit of unit holder will increase to the extent of the dividend reinvested divided by the first 'Ex-income Distribution NAV' on the day of reinvestment as explained above. There shall, however, be no entry load on the dividends so reinvested.

8. Allotment

Allotment of Units will be made to the eligible applicants under the Scheme/s who comply with the terms of the scheme/s.

Allotment of units will be made to all the applicants provided the applications are complete in all respects. [Fractional units will be allotted up to four decimals]. However, acceptance of application and allotment of units / fractional units will be at the absolute discretion of the Trustees and the application can be rejected without assigning any reason whatsoever.

Date of subscription at the notified centers is deemed to be the date of allotment for claiming tax benefits under the Scheme, provided the application has not been rejected by the Fund subsequently for the reasons explained above.

9. Redemption

The redemption or repurchase proceeds shall be dispatched to the unit holders within 10 working days from the date of receipt of redemption or repurchase request.

10. Delay in payment of redemption / repurchase proceeds

The Asset Management Company shall be liable to pay interest to the unit holders at such rate as may be specified by SEBI for the period of such delay (presently @ 15% per annum).

11. **Who can invest?** (This is an indicative list and you are requested to consult your financial advisor to ascertain whether the scheme is suitable to your risk profile.)

Applicable to Canara Robeco Gilt (PGS) Scheme:

Non – Government Provident Funds, Super Annuation Funds & Gratuity Funds pursuant to notification Dtd 31.03.1999 issued by Dept. of Economic Affairs, Ministry of Finance.

Applicable to all schemes(except Canara Robeco Gilt (PGS)) covered under this common SID.

Adult Individual(s) and also minor(s) through their parent/guardian. (Application of minors jointly with adults not allowed).

- Adult Individual(s) jointly not exceeding three, on first holder or survivor/s basis.
- Hindu Undivided Family (HUF)
- Partnership Firms
- A Company as defined in the Companies Act, 1956, Public Sector Undertakings.
- A Body Corporate established by or under any law in force in India.
- A Co-operative Society registered under any law relating to Co-operative Societies in India.
- A Religious or Charitable Trust / Wakfs or a Society established under the relevant laws and authorised to invest in Mutual Fund Schemes.
- FIIs registered with SEBI.

- Banks and Financial Institutions.
- Pension Funds/Pension Fund Managers.
- Non Resident Indians (NRIs) and Persons of Indian Origin (PIOs) on repatriation / non-repatriation basis.
- Army, Air Force, Navy and other para-military units and bodies created by such institutions. Scientific and Industrial Research Organisations.
- Multilateral Funding Agencies / Body Corporates incorporated outside India with the permission of Government of India / Reserve Bank of India
- Other Schemes of the Fund subject to the conditions and limits prescribed under SEBI Regulations.
- Any other category of investors that may be permitted by the Trustees as per the Indian Laws in future.

12. Where can you submit the filled up applications?

M/s Karvy Computershare Pvt. Ltd..
21, Road No.4, Street No. 1,
Banjara Hills, Hyderabad 500034
Tel No. (044) 23390404, 23394436, 2337901
Fax. (040) 23311968

Submission of forms for subscription and redemption during ongoing sale / redemption can be made at the Sales Offices of the AMC(Please refer the back cover page)or Official Points of Acceptance of the R & T Agent.

13. How to apply

Please Refer the SAI and Application Form for the instructions

Please note that it is mandatory for Unit holders to:

1. Mention their bank account numbers in their application for purchase of units and redemption requests.
2. Mention their Permanent Account Number (PAN) in their application

14. Listing

As the repurchase facility is provided on an ongoing basis, at NAV related prices, the units of the Scheme/s are not proposed to be listed on any Stock Exchanges. However, the Mutual Fund may at its sole discretion list the Units under the Scheme(s) on one or more stock exchange at a later date.

15. Restrictions, if any, on the right to freely retain or dispose of units being offered.

The AMC reserves the right to reject any subscription/ application for units of the Fund during NFO, depending on the prevailing market conditions and to protect the interest of the Investors. Investors may, however, offer the units for repurchase any time before the maturity of the Fund and such repurchases are subject to exit load and subject to restrictions on repurchase mentioned elsewhere in this document. Trustees shall approve such restrictions which shall be intimated to SEBI and shall be notified to all the unit holders by publishing the same in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated.

16. Ongoing price for redemption (sale) /switch outs (to other schemes/plans of the Mutual Fund) by investors.

At the applicable NAV subject to prevailing exit load.

This is the price you will receive for redemptions/switch outs. Example: If the applicable NAV is Rs. 10, exit load is 1% then redemption price will be: $Rs. 10 * (1-0.01) = Rs. 9.90$

17. Ongoing price for purchase/switch in (to other schemes/plans of the Mutual Fund) by investors.

At the applicable NAV.subject to load, if any.

This is the price you will pay for purchase/switch in. Example: If the applicable NAV is Rs. 10, entry load is 1% then redemption price will be: $Rs. 10 * (1+ 0.01) = Rs. 10.10$

18. Applicable NAV for Sale of Units / Switch In

Applicable to Canara Robeco Liquid Scheme:

For Liquid Schemes

Applicable NAV for sale of Units for Liquid Schemes:

- i. where the application is received upto 2.00 p.m. on a day and funds are available for utilization before the cut-off time without availing any credit facility, whether, intra-day or otherwise – the closing NAV of the day immediately preceding the day of receipt of application;
- ii. where the application is received after 2.00 p.m. on a day and funds are available for utilization on the same day without availing any credit facility, whether, intra-day or otherwise - the closing NAV of the day immediately preceding the next business day; and
- iii. irrespective of the time of receipt of application, where the funds are not available for utilization before the cut-off time without availing any credit facility, whether, intra-day or otherwise – the closing NAV of the day immediately preceding the day on which the funds are available for utilization.

For allotment of units in respect of subscriptions/purchase in Liquid scheme(s), it shall be ensured that:

- i. Application is received before the applicable cut-off time.
- ii. Funds for the entire amount of subscription/purchase as per the application are credited to the bank account of the respective Liquid scheme(s) before the cut-off time.
- iii. The funds are available for utilization before the cut-off time without availing any credit facility whether intra-day or otherwise, by the respective Liquid scheme(s).

For allotment of units in respect of switch-in to Liquid scheme(s) from other schemes, it shall be ensured that:

- i. Application for switch-in is received before the applicable cut-off time.
- ii. Funds for the entire amount of subscription/purchase as per the switch-in request are credited to the bank account of the respective switch-in Liquid scheme(s) before the cut-off time.
- iii. The funds are available for utilization before the cut-off time without availing any credit facility whether intra-day or otherwise, by the respective switch-in schemes.

For Debt/Income Schemes (other than Liquid Scheme)

For applicable NAV and allotment of units in respect to sale of units in Debt/Income schemes other than Liquid schemes with amount equal to or more than Rs.1 crore, it shall be ensured that

- a) For applications received up to 3 p.m, along with instruments payable at par at the place of receipt, closing NAV of the same day on which the application is received shall be applicable.
 - b) For applications received after 3 p.m, along with instruments payable at par at the place of receipt, closing NAV of the next business day shall be applicable.
 - c) For applications received with outstation instruments not payable at par at the place of receipt, closing NAV of the day of realization of the instruments shall be applicable.
 - d) For applications received on non-business day along with instruments payable at par at the place of receipt, closing NAV of the next business day shall be applicable
 - e) Where the Application for amount equal to or more than Rs.1 crore is received upto 3 p.m (i.e. cut off time for Debt/ Income Scheme(s) other than Liquid schemes) on a day and funds for entire amount of subscription/ purchase as per application are credited to the Bank account of the respective scheme(s) before the cut-off time i.e. available for utilization before the cut-off time – the closing NAV of the day shall be applicable.
 - f) where the application for amount equal to or more than Rs.1 crore is received after 3.00 p.m. on a day and funds for entire amount of subscription/ purchase as per application are credited to the Bank account of the respective scheme(s) before cut-off time of the next business day i.e. available for utilization before the cut-off time of the next business day- the closing NAV of the next business day shall be applicable and
19. irrespective of the time of receipt of application for amount equal to or more than Rs.1 crore, where funds for entire amount of subscription/ purchase as per application are credited to the Bank account of the respective scheme(s) before the cut-off time on any subsequent business day i.e. available for utilization before the cut-off time on any subsequent business day– the closing NAV of such subsequent business day shall be applicable.

20. Cut off timing for redemptions/ switch - out:

This is the time before which your application (complete in all respects) should reach the official points of acceptance.

For Canara Robeco Liquid Scheme: a) For applications received up to 3 p.m., the closing NAV of the day immediately preceding the next business day shall be applicable.

b) For applications received after 3 p.m., closing NAV of next business day shall be applicable.

Applicable for other schemes covered under this SID

a).For applications received up to 3 p.m., same day's closing NAV shall be applicable.

b) For applications received after 3 p.m., closing NAV of next business day shall be applicable.

The Trustees reserve the right to amend the cut off timings subject to SEBI regulations for the smooth and efficient functioning of the Scheme/s

21. Accounts Statements

For normal transactions (other than STP) during ongoing sales and repurchase:

- The AMC shall issue to the investor whose application (other than STP) has been accepted, an account statement specifying the number of units allotted
- For those unit holders who have provided an e-mail address, the AMC will send the account statement by e-mail.
- The unit holder may request for a physical account statement by writing/calling the AMC/ISC/R&T.

For SIP/ STP transactions:

- Account Statement for SIP/STP will be despatched once every quarter ending March, June, September and December within 10 working days of the end of the respective quarter.
- A soft copy of the Account Statement shall be mailed to the investors under SIP/STP to their e-mail address on a monthly basis, if so mandated.
- However, the first Account Statement under SIP/STP shall be issued within 10 working days of the initial investment/transfer.
- In case of specific request received from investors, Mutual Funds shall provide the account statement (SIP/STP) to the investors within 5 working days from the receipt of such request without any charges.

Annual Account Statement:

- The Mutual Funds shall provide the Account Statement to the Unit holders who have not transacted during the last six months prior to the date of generation of account statements. The Account Statement shall reflect the latest closing balance and value of the Units prior to the date of generation of the account statement
- The account statements in such cases may be generated and issued along with the Portfolio Statement or Annual Report of the Scheme.

Alternately, soft copy of the account statements shall be mailed to the investors' e-mail address, instead of physical statement, if so mandated.

B. PERIODIC DISCLOSURES

- 1. Net Asset Value (This is the value per unit of the scheme on a particular day. You can ascertain the value of your investments by multiplying the NAV with your unit balance)**

The Mutual Fund shall declare the Net asset value of the scheme on every business day on AMFI's website www.amfiindia.com by the *(time limit for uploading NAV as per applicable guidelines)* and also on www.canararobeco.com.

The NAV calculated as above and Sale/Repurchase rates of units will be published in two news papers on a daily basis, by way of press release / advertisement. In addition, the NAV, Sale and Repurchase rates for all business days will be available at our Branch Offices.

- 2. Half yearly Disclosures: Portfolio / Financial Results (This is a list of securities where the corpus of the scheme is currently invested. The market value of these investments is also stated in portfolio disclosures.)**

Before expiry of one month from the close of each half year that is on 31st Mar and 30th Sept, the Fund shall publish its un-audited financial results in one national English daily newspaper and in a newspaper in the language of the region where the Head Office of the Fund is situated.

These shall also be displayed on the web site of the Fund and that of AMFI.

- 3. Annual Report**

An abridged Scheme-wise annual report shall be mailed to all unit holders not later than four months from the date of closure of the relevant accounting year and the full annual report shall be made available for inspection at the Head Office of the Fund and a copy shall be made available to the unit holders on request on payment of nominal fees, if any

Investor(s) who have provided their email address in the application form or any subsequent communication in any of the folio belonging to the investor, Electronic Mail (email) shall be treated as a default mode for sending various statutory communications including Abridged Annual Report to the investor. The investor(s) may however on request obtain a physical copy of Abridged Annual Report or any other statutory communication.

- 4. Associate Transactions**

Please refer to Statement of Additional Information (SAI).

- 5. Taxation** (The information is provided for general information only. However, in view of the individual nature of the implications, each investor is advised to consult his or her own tax advisors/authorised dealers with respect to the specific amount of tax and other implications arising out of his or her participation in the schemes.)

	Investors	Mutual Fund
Dividend Distribution Tax (Applicable to Canara Robeco Liquid Scheme)	Distribution tax at the rate of 27.681%% for Individual and HUF investors and at the rate of 27.681% applicable to other investors	No Tax

Dividend Distribution Tax (Applicable to other Schemes covered under this SID.	Distribution tax at the rate of 13.841% for Individual and HUF investors and at the rate of 22.145% applicable to other investors	
Capital Gains:		
Long Term	20% with indexation or 10% without indexation	No Tax
Short Term	Tax at marginal rate.	No Tax

For further details on taxation please refer to the clause on Taxation in the SAI

6. Investor services

 E-Mail : manjiri.dolhare@canararobeco.com

D. COMPUTATION OF NAV

The computation of NAV, valuation of securities / assets, accounting policies and standards would be in conformity with the SEBI (Mutual Funds) Regulations, 1996 and guidelines issued from time to time. The NAV per unit shall be calculated as follows:

$$\frac{\text{+ Current assets - Current Liabilities and Provisions}}{\text{No. of Units outstanding under the Scheme}} = \text{NAV (Rs.)}$$

The price arrived shall be rounded off up to four decimals.

IV. FEES AND EXPENSES

A. NEW FUND OFFER (NFO) EXPENSES

As this is an ongoing offer, there are no New Fund Offer Expenses.

B. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below.

Other Expenses	0.00%	0.02%
Total Recurring Expenses	0.40%	2.25%

These estimates have been made in good faith as per the information available to the Investment Manager based on past experience and are subject to change inter-se. Types of expenses charged shall be as per the SEBI (MF) Regulations.

While the expense ratio may remain the same, the heads may change inter se and the total expenses shall not exceed 2.25% of the amount of the Scheme's average daily net assets. Subject to SEBI Regulations, the AMC reserve the right to modify the above estimate for recurring expenses on a prospective basis.

As per the Regulation 52, the investment management fee and total annual scheme recurring expenses chargeable to the Scheme are as under:

- On the first Rs.100 Crore of the average weekly net assets - 2.25%
- On the next Rs.300 Crore of the average weekly net assets - 2.00%
- On the next Rs.300 Crore of the average weekly net assets – 1.75%
- On the balance of the assets – 1.50%

C. LOAD STRUCTURE

Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.canararobeco.com) or may call at (1800 209 2726) or your distributor.

Bonus units and units issued on reinvestment of dividends shall not be subject to entry load, if any.

The distributors shall disclose all the commissions (in the form of trail commission or any other mode) payable to them for the different competing schemes of various mutual funds from amongst which the Scheme is being recommended to the investor. Any change in load structure, including CDSC (if any), shall be applicable for prospective investments only.

The investors will be advised of the change in the Load structure by the AMC through an Addendum attached to the Offer Document as well as a public notice shall be given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of region where the Head Office of the Mutual Fund is situated. Such Addendum will be sent along with the Newsletter to the investors periodically. The AMC will also inform the investor service centres, Branch Offices/Distributors/Brokers/Intermediaries etc. of any change in the load structure. The latest modification in the load structure whether by way of Exit Load or CDSC will be stamped in the acknowledgment slip issued to the investor on submission of the Application Form and will also be disclosed in the Statement of Accounts issued after introduction of such load / CDSC.

With effect from August 01, 2009, exit load / CDSC (if any) up to 1% of the redemption value charged to the unit holder by the Fund on redemption of units shall be retained by each of the schemes/plans in a separate account and will be utilized for payment of commission to the ARN Holder and to meet other marketing and

selling expenses.. Any amount in excess of 1% of the redemption value charged to the unit holder as exit load /CDS shall be credited to the respective scheme/ plan immediately.

VI. PENALTIES, PENDING LITIGATION OR PROCEEDINGS, FINDINGS OF INSPECTIONS OR INVESTIGATIONS FOR WHICH ACTION MAY HAVE BEEN TAKEN OR IS IN THE PROCESS OF BEING TAKEN BY ANY REGULATORY AUTHORITY

1. During the last three years, neither SEBI nor any other Regulatory body has awarded any penalty under SEBI Act or Regulations and there is no enquiry or adjudication proceeding/s, that are in progress against the Sponsors or any company associated with the Sponsors in any capacity including the AMC, the Board of Trustees or any of the Directors or key personnel of the AMC under the SEBI Act or any other Regulations. In addition, no penalties have been awarded for any economic offences and violation of securities laws.
2. (a) The Mutual Fund is defending and / or filed cases in the Special Court constituted under the Special Court (Trial of Offences relating to transactions in Securities) Act, 1992 in respect of the claims arising out of scam related transactions. The Fund has taken necessary steps as legally advised.

(b) Writ Petitions have been filed before the Hon'ble Mumbai High Court and Hon'ble Kolkata High Court, for direction to prohibit Canara Robeco Mutual Fund from converting the close ended Cantriple+ Scheme into open ended and for direction regarding payment of three times the original investment. Cases are also pending before various Consumer Fora claiming three times the investment in Cantriple+ Scheme. The cases are at various stages of hearing. The Fund has taken necessary steps as legally advised.

(c) There are about 61 consumer cases (including appeals) filed by various parties against the Fund in respect of the various schemes of the Fund, which are pending.

In respect of the cases mentioned above, the Fund / Investment Manager will abide by the final decision of the courts.
3. No criminal cases are pending against the Sponsors, any company associated with the Sponsors in any capacity, AMC, Board of Trustees, any of the Directors or key personnel. The Sponsors, Canara Bank, has over 3000 branches and Robeco Groep N V has several offices across the world. To the best of our knowledge and belief, no criminal cases which may affect the business of Mutual Fund are pending against the Sponsors or any company associated with the Sponsors in any capacity or any of the Directors or key personnel."

IMPORTANT NOTICE
