Type & Category: An open-ended debt scheme predominantly investing in debt instruments of banks, public sector undertakings, public financial institutions and municipal bonds. A relatively high interest rate risk and moderate credit risk.

Investment Objective: To generate income and/or capital appreciation through a portfolio of high quality debt and money market instruments issued by entities such as Banks, Public Sector Undertakings (PSUs), Public Financial Institutions (PFIs) and Municipal Bonds. However, there is no assurance that the objective of the fund will be realised.

Scheme Code: CANA/D/BPP/22/02/0022

Investment Strategy: Being an open-ended debt scheme, the fund would predominantly invest in debt and money market instruments of banks, public sector undertakings, public financial institutions and Municipal Bonds. The scheme will follow an active interest rate management strategy and aim to generate income and/or capital appreciation through a portfolio of high-quality debt and money market instruments consisting predominantly of securities issued by entities such as Banks, Public Sector Undertakings (PSUs) and Public Financial Institutions (PFIs) and Municipal Bonds. Investments in central and state government may be undertaken for active duration management.

Performance will depend on the Asset Management Company's ability to assess accurately and react to general market conditions and changing financial characteristics of the securities. The general maturity/Macaulay Duration range for the portfolio in relation to the market based on its interest rate outlook will be arrived at after a rigorous and close monitoring of various macro variables. The shifts within this range are then determined by short-term cyclical trends in the economy. Depending upon prevailing market conditions & interest rate scenario, the portfolio Macaulay Duration and average maturity can be increased or decreased. In case of a rising interest rate environment the Macaulay Duration/average maturity of the scheme may be reduced whereas in a falling interest rate scenario the holding in medium / long securities may be maximized.

The Investment Manager will actively monitor the prevailing political conditions, economic environment (including interest rates and inflation etc.), performance of the corporate sector and general liquidity as well as other considerations in the economy & markets to assess the likely direction of interest rates and to position the portfolio appropriately to take advantage of the same. It is the responsibility of the AMC to seek to keep the scheme as per the Regulatory guidelines, the investment objective of the Scheme and in the interest of the Unit Holders of the Scheme.

The AMC will keep a record of all investment decisions in accordance with the guidelines issued by SEBI. The AMC and Trustees will review the performance of the scheme in their Board meetings. The performance measurement would be against the benchmark index as well with the peer group in the industry.

SCHEME SPECIFIC RISK FACTORS

Some of the specific risk factors related to the Scheme include, but are not limited to the following:

Risks associated with investments in Fixed Income Securities

Price-Risk or Interest-Rate Risk: Fixed income securities such as bonds, debentures and money market instruments and derivatives run price-risk or interest-rate risk. Generally, when interest rate rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of the security may go down when the credit rating of an issuer goes down. It must, however, be noted that where the Scheme/s has invested in Government securities, these are considered zero credit risk securities due to sovereign nature of securities.

Re-investment Risk: Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

Liquidity Risk: This refers to the ease with which a security can be sold at or near to its valuation or yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted in the secondary market.

Basis Risk: This risk arises from potential risk in mismatched hedging position. Basis risk occurs when a hedge is imperfect, so that the losses in an investment are not exactly offset by the hedge position. If a floating rate instrument is being hedged through a swap or interest rate future (IRF) and the hedge is imperfect, then losses in the investment position will not be fully offset by the swap/IRF position, leading to adverse impact on the NAV.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment, due to illiquid nature of these types of security. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Settlement Risk: Fixed income securities run the risk of settlement when a security transaction done by the dealer for the fund, is not settled either due default by the counterparty or due to some technical issues in the settlement platform. This may lead to liquidity issues for the fund and may impact NAV adversely.

Pre-payment Risk: Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.

Risk associated with investing in Derivatives:

As and when Schemes trades in the derivatives market, there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the “counter party”) to comply with the terms of the derivatives contract. Other risk in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Derivatives can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involve uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.

The risk associated with the use of derivatives is different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in the losses that significantly exceed the Scheme’s original investment. Certain derivatives may give rise to a form of leverage. Due to the low margin deposits normally required in trading financial derivative instruments, an extremely high degree of leverage is typical for trading in financial derivative instruments. As a result, the Scheme may be more volatile than if the Scheme had not been leveraged because the leverage tends to exaggerate the effect of any increase or decrease in the value of the Scheme’s portfolio. A relatively small price movement in a derivative contract may result in substantial losses to the investor.

Derivatives are also subject to the risk that changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index. The use of derivatives for hedging or risk management purposes or to increase income or gain may not be successful; resulting in losses to the Scheme and the cost of such strategies may reduce the Scheme’s returns and increase the Scheme’s potential for loss.

The Scheme may use derivatives to hedge market and currency risk, and for the purposes of efficient portfolio management. The use of derivatives may expose the Scheme to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions are geared.

Trading in derivatives has the following risks:

a) Derivatives in excess of the hedging requirements can lead to losses.

b) An exposure to derivatives can also limit the profits from a genuine investment transaction.

c) Efficiency of a derivative market depends on the development of a liquid and efficient market for underlying securities.

d) Particular Risks of Exchange Traded Derivative Transactions: The securities exchange on which the shares of the Scheme may be listed may have the right to suspend or limit trading in all securities which it lists. Such a suspension would expose the Scheme to losses and delays in its ability to redeem shares of the Scheme.

e) Income Distribution cum Capital Withdrawal (Dividends): The Scheme may distribute not only investment income, but also realised capital gains or capital. Where capital is distributed, this will result in a corresponding reduction in the value of shares of the Scheme, and a reduction in the potential for long-term capital growth.

f) Warrants: The Scheme may invest in warrants, the values of these warrants are likely to fluctuate more than the prices of the underlying securities because of the greater volatility of warrant prices.

g) Futures and Options: The Scheme may use options and futures on securities, indices and interest rates for the purpose of efficient portfolio management. Transactions in futures and options carry a high degree of risk. A relatively small market movement will have a proportionately larger impact which may work for or against the investor. The placing of certain orders which are intended to limit losses to certain amounts may not be effective because market conditions may make it impossible to execute such orders.

h) Listing: In case the shares of the Scheme are listed, the exchanges on which those shares are listed will have no responsibility for the contents of any prospectus issued by the Scheme or will make no representations as to its accuracy or completeness and expressly disclaim any liability whatsoever for any kind of loss arising from or in reliance upon any part of any such prospectus.

III. Other Risks

Zero coupon or Deep Discount Bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specific date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face value. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the issuer. The market rates of zero-coupon securities are generally more volatile than the market price of securities that pay interest periodically and are likely to respond to changes in interest rates to a greater degree than other coupon bearing securities having similar maturities and creditworthiness.
In the event of substantial investment by the Sponsor/s, or its associates in the Scheme, any redemption by these entities may have an impact on the performance of the Scheme. Canara Robeco Mutual Fund will not be responsible for any loss of tax benefits in the event of winding up of the Scheme(s) or for any amendments in the tax laws that may affect the tax benefits available under the Scheme(s). The tax benefits are based on the present laws and rules in force IV. Risks Associated with investing in Money Market Instruments: Investments in money market instruments would involve moderate credit risk i.e., risk of an issuer’s inability to meet interest and principal payments. Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, the general level of market liquidity and market perceptions of the issuer and the issuer of such instruments. The NAV of the Units, to the extent that the corpus of the Scheme is invested in money market instruments, will be affected by changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline.

V. Risks associated with Securities Lending

There are risks inherent to securities lending, including the risk of failure or bankruptcy of the counterparty, leading to non-compliance with the terms of the agreement by the counterparty. Such default may result in the possible loss of rights to the collateral, the inability of the counterparty to return the securities deposited by the lender and the possible loss of any corporate benefits accruing thereon. The Mutual Fund may not be able to sell such Securities and this can lead to temporary illiquidity.

VI. Risks associated with investing in Tri Party Repo through CCLL (TREPS)

All the market repo and Tri-party repo, are settled through Clearing Corporation of India Limited (CCLL). CCLL acts as a Central Counterparty (CCP) to all trades received for settlement. Risk of Robeco Mr the TREPS, Repo & Reverse Repos in Government Securities/Treasury Bills emanates mainly on two counts –

a. Risk of failure by a lender to make funds available or by a borrower to provide adequate collateral security to accept the fund at the first leg of borrowing and lending under Tri-party Repo transaction or Repo transactions in Government Securities / Treasury Bills.

b. Risk of default by a borrower in repayment.

VII. risks associated with Creation of Segregated Portfolio

Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. Security comprising of segregated portfolio may not realise any value. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV. VIII. Risk Factors Associated with Investments in REITs and InvITs

- **Market Risk**: REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to factors impacting the underlying assets. AMC/Mutual Manager’s will do the necessary due diligence but actual market movements may be at variance with the anticipated trends.

- **Liquidity Risk**: As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.

- **Reinvestment Risk**: Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of Units or dividend settlement. Risk of exposure in the TREPS, Repos & Reverse Repos in Government Securities / Treasury Bills.

- **Default Risk**: Risk of default by a lender in repayment.

IX. Risk associated with investment in Debt Securities with Call & Put options

Prepayment Risk: A Fixed income security with call options gives the issuer a right to call back its securities before their maturity date. This exposes the holder to Preinvestment Risk i.e. early receipt of fund may be deployed at lower interest rate then the holder getting was called. Especially, during periods of rising interest rates, the holder has the opportunity to reinvest the funds at lower interest rates which is a cost. If the issuer has the option to exercise this right of prepayment. Such a prepayment during falling interest rates periods may force the Scheme to reinvest the redemption proceeds in securities that are offering lower yields, thereby resulting in lower interest income.

Default Risk: A fixed income security with put options gives the holder to offer the securities to the issuer before their maturity date. A holder of a put table bond may decide to exercise the put in case the securities issuer’s financial position is deteriorating thus jeopardizing its ability to pay off debt. In this case, the inability of the issuer to meet this early obligation, due to adverse changes in financial conditions of the issuer, economic and political conditions in general, or specific conditions relating to the issuer and to reduce in value either due to adverse ratings change or due to the failure and/or losses for forcibly exiting the position.

X. Risk associated with investment in Debt Securities with ratings qualified as Credit Enhancements (CE)

Ratings companies issue a rating to a security based on specific credit enhancement given to an instrument by another entity to enhance the credit profile of the issuer. This entity is generally the parent company of the issuer. The credit enhancement could be a guarantee, shortfall undertaking, letter of comfort, etc. from the entity and could also include additional security in form of cash collateral, pledge of shares listed on stock exchanges, personal guarantee of promoters etc.

**Liquidity Risk**: Due to the credit enhanced nature of these instruments during adverse market conditions the liquidity of these securities are much lower than similar unrated counterparties. Without an active market, there could be difficulty in selling them and may have to incur losses due to higher impact costs for exiting such positions.

**Credit Risk**: Any weakness in the credit enhancement structure or weakness in rating of the credit enhancement provider, will have adverse credit impact of these instruments, which could reduce in value of these instruments.

**Market Risk**: Credit enhancement helps in enhancing credit profile of a structured financial transaction through provision of additional security/financial support, for covering losses on securitised assets in adverse conditions. For the debt instruments having credit enhancements backed by equity shares, must be sufficiently covered to address the market risk. Such investments are volatile and subject to price fluctuations owing to factors impacting the underlying assets. AMC/Fund Manager’s will do the necessary due diligence but actual market movements may be at variance with the anticipated trends.

XI. Risk factors associated with investments in Instruments having Special Features - Additional Tier 1 bonds (AT-1)

**Default Risk/ Credit Risk**: This is the risk that losses will be incurred due to default by counter party. This is also known as credit risk or counterparty risk. This risk pertains to the risk of default of payment of principal and interest in the times of severe financial stress.

These instruments are issued by banks that have no guarantee as these bonds are issued by banks. It is to show to the public that these banks have credit rating below certain thresholds, they can skip interest payments on these bonds and even write-down their value. This makes a lot closer in nature to equity than debt.

**Repayment Date Risk**: Maturity of these bonds is simply the Issuer’s right to repay the principal value. The Issuer is not bound to pay back the investors in these bonds. They may choose not to repay the principal and simply keep paying the interest.

**Interest Rate Risk**: Higher interest rates often follow a rise in inflation. When interest rates rise, bond prices fall and vice-versa. The effect is particularly strong for long-dated bonds. A drop in the bond’s price does make much difference in case if the bond is held till maturity. However, if in case of sale of these bonds, the seller may get a lower price when interest rates rise. Risk on Coupon Servicing: Banks as per the terms of the instruments, issuers of these bonds have discretion at all times to cancel distributions/ prepayment, redemption (instead of being cancelled), in case paying the coupon leads to breach of capital ratios.

**Risk of write-down or conversion into equity**: As per current RBI guidelines, banks have to maintain a Common Equity Tier-1 (CET-1) ratio of minimum 5.5% of Risk Weighted Assets (RWAs), failing which the AT-1 bonds can get written down. Further, AT-1 Bonds are liable to be written down or converted to common equity, at the discretion of RBI, in the event of Point of Non Viability Trigger (PONV). PONV is a point, determined by RBI, when a bank is deemed to have become non-viable unless there is a write off/ conversion to equity of AT-1 Bonds or a public sector capital injection happens. The write-off/conversion has to occur prior to public sector injection of capital.

**Backstop Facility in form of Investment in Corporate Debt Market Development Fund (CDMDF)**

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund (‘AIF’) in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 (“AIF Regulations”). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented CRMF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. This backstop facility will help fund managers of the aforementioned schemes to better generate liquidity during periods of market dislocation to help the schemes fulfill liquidity obligations under stress situations.

In accordance with the requirement of Regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMDCP/202/2012 dated July 27, 2023 on ‘Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund’, the aforementioned schemes shall invest 25 bps of its AUM and for schemes meeting this requirement in corporate debt market development fund (‘CDMDF’). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, after the appreciation on the same, if any, shall be locked-in till winding up of the CDMDF.

**Investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF**

**Investors are requested to read detailed disclosure on investment of the schemes in the CDMDF as listed in sub-section “C. How will the Scheme allocate its assets?” and sub-section “D. Where will the Scheme Invest” in Section “9. Information about the scheme” in SID.**
Other Risks:
Zero coupon or Deep Discount Bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specific date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face value. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the issuer. The market rates of zero coupon securities are generally more volatile than the market price of securities that pay interest periodically and are likely to respond to changes in interest rates to a greater degree than other coupon bearing securities having similar maturities and creditworthiness.

In the event of substantial investment by the Sponsor/s, or its associates in the Scheme, any redistribution by these entities may have an impact on the performance of the Scheme.

Canara Robeco Mutual Fund will not be responsible for any loss of tax benefits in the event of winding up of the Scheme(s) or for any amendments in the tax laws that may affect the tax benefits available under the Scheme. The tax benefits are based on the present laws and rules in force.

Risks associated with investing in foreign securities/overseas investments/offshore securities:

- Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.
- Since the Scheme would invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of such Scheme. To manage risks associated with foreign currency and interest rate exposure, the AMC may use derivatives for efficient portfolio management and hedging and portfolio rebalancing and in accordance with conditions as may be stipulated under the Regulations and by RBI from time to time.
- Investment in Foreign Securities involves a currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative.

Risks associated with Short Selling

Purchasing a security entails the risk of the security price going down. Short selling of securities (i.e. sale of securities without owning them) entails the risk of the security price going up. If the sale is under the profitability of the short position. Short selling is subject to risks related to fluctuations in market price, and settlement/liquidity risks. If required by the Regulations, short selling may entail margin money to be deposited with the clearing house and daily mark to market of the prices and margins. This may impact on funding and may induce liquidity risks if the fund is not able to provide adequate margins to the clearing house. Failure to meet margin requirements may result in penalties being imposed by the exchanges and clearing house.

Risk Factors Associated with Investments in REITs and InvITs:

- **Market Risk**: REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to factors impacting the underlying assets. AMC/Fund Manager’s will do the necessary due diligence but actual market movements may be at variance with the anticipated trends.
- **Liquidity Risk**: As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.
- **Reinvestment Risk**: Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or IDCW pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- **Regulatory/Legal Risk**: REITs and InvITs being new asset classes, right of unit holders such as right to information etc may differ from existing capital market asset classes under Indian Law.

Risk factors associated with Creation of Segregated Portfolio

Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. Security comprising of segregated portfolio may not realise any value listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risk Control Mechanism:

Since investing requires disciplined risk management, in order to protect the interests of investors, the AMC would incorporate adequate safeguards for controlling risks in the portfolio. As a prudent measure, the AMC has broad internal investment norms and investments made through the scheme would be in accordance with the investment objectives of the schemes and provisions of SEBI Regulations. Where required, scheme specific guidelines are also in place.

**Debt Securities**

Concentration of risk is mitigated by defining issuer limits. Rigorous in-depth credit evaluation of the issuers will be conducted by the investment team before making investments. As part of credit evaluation, a study on the operating environment, past track record as well as future prospects of the issuer, short as well as long term financial health of the issuer will be carried out. The AMC will be guided by the ratings of accredited agencies such as CRISIL, CARE, ICRA etc. as well as the internal norms for credit exposure.

**Equity and Equity Related Instruments**: Investments made by the schemes would be in accordance with the investment objectives of the schemes and provisions of SEBI Regulations. Since investing required disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, the investment team of the AMC will carry out rigorous in-depth analysis of the securities proposed to be invested in.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

**Securitised Debt**

As a risk control measure, the Scheme shall make investment in such Securitised Debts which have a minimum rating of P1+ and/or such other equivalent rating for short term papers or AAA and/or such other equivalent rating for long term papers which suits the risk profile of the Scheme.

The ratings AAA or its equivalent, P1+ or its equivalent assigned to instruments reflects highest degree of safety with regard to timely payment of financial obligations and the + sign reflects comparatively better standing within the category. Investments in these instruments with the highest ratings suit the risk profile of the Scheme relating to Debt and Money Market Instruments, the same being “Low to Medium”. The investment shall be in those securitised debt instruments which mature on or before the maturity date of the Scheme and the Scheme shall not invest in any Pool of Assets.

Policy relating to Originator(s) – The Scheme shall invest in those Securitised Debts, whose Originator is a Corporate Entity, being a Bank or an NBFC. The Scheme shall invest in the instruments subject to necessary investment limits mentioned under SEBI regulations. Risk may be mitigated by seeking additional credit support (credit enhancement) in order that the instrument(s) may receive the desired level of credit rating. Further, prior to investing in Securitised Debt, it would be ensured that the minimum retention period of the debt and minimum retention percentage by the Originator prior to securitization shall be as prescribed by the RBI guidelines. Any investment in Securitised Debt has to go through an independent credit appraisal process and no special consideration shall be given to whether the Originator has invested in any Scheme(s) of Canara Robeco Mutual Fund.

Level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments – The Scheme shall not be investing in any pool of assets. Investment in such securities shall only be single loan securitized debt instruments backed by originator as referred above.

Resources and mechanism of individual risk assessment for monitoring investment in securitized debt – Dedicated credit analyst prepares a credit note analyzing the proposal including detailed risk assessment of the underlying. The credit note is recommended by the Head of Fixed income and is approved by the Investment committee. The dedicated credit analyst shall be responsible for timely analyzing the risk and monitoring the performance of such investments made on an ongoing basis and shall report to the investment committee the outstanding position, every quarter.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

**Risks associated with investing in Tri Party Repo through CCIL (TREPS)**

All the market repo and Tri-party repo, are settled through Clearing Corporation of India Limited (CCIL). CCIL acts as a Central Counterparty (CCP) to all trades received for settlement. Risk of exposure in the TREPS, Repos & Reverse Repos in Government Securities/Treasury Bills emanates mainly on two counts – Risk of failure by a lender to make funds available or by a borrower to provide adequate collateral security to accept the fund at the first leg of borrowing and lending under Tri-party Repo transaction or Repo transactions in Government Securities / treasury Bills. Risk of default by a borrower in repayment. AMFI vide Best Practice Circular dated October 12, 2022 has provided the following liquidity management tools. The said tools have been incorporated in the Liquidity Risk Management Policy which has been approved by the Investment Committee & Executive Risk Management Committee of the AMC, the Board of Directors AMC and Board of the Trustees of Mutual Fund.

The two conditions mentioned above shall be complied within each subsequent calendar quarter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be given and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. Thus, there shall be no internal sub-limits within the expense ratio for expense heads mentioned under Regulation 52 (2) and (4) respectively. Further, the additional expenses under Regulation 52(6A)(c) shall also be incurred towards the same expense heads. However, as per Para 10.1.7 of SEBI Master Circular for Mutual Funds dated May 19, 2023 in cases of all schemes, wherein exit load is not levied/not applicable, the AMC will not be eligible to charge the above mentioned additional expenses for such schemes.

The purpose of the above table is to assist the Investor in understanding the various costs and expenses that an Investor in the Scheme will bear directly or indirectly. The figures in the table above are estimates. The actual expenses that can be charged to the Scheme will be subject to limits prescribed from time to time under the SEBI (MF) Regulations.

As per the Regulation 52, the investment management fee and total annual scheme recurring expenses chargeable to the Scheme are as under:

(a) Additional Expenses under Regulation 52 (6A):

brokerage and transaction costs which are incurred for the purpose of execution of trade and is included in the cost of investment, not exceeding 0.12 per cent in case of cash market transactions and 0.05 per cent in case of derivatives transactions;

In accordance with Para 10.1.14 of SEBI Master Circular for Mutual Funds dated May 19, 2023, any payment towards brokerage and transaction cost, over and above the said 0.12% and 0.05% for cash market transactions and derivatives transactions respectively, may be charged to the Scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under Regulation 52 (6) of the SEBI (MF) Regulations, 1996.

(b) Expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from such cities as specified by SEBI from time to time are at least -

(i) 30 per cent of gross new inflows in the scheme, or;

(ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from such cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis;

The said additional expenses on account of inflows from beyond top 30 cities so charged shall be clawed back in the respective schemes, in case the said inflow is redeemed within a period of 1 year from the date of investment. The expenses charged under this clause shall be utilized for distribution expenses incurred for bringing inflows from such cities.

As per Para 10.1 of SEBI Master Circular for Mutual Funds dated May 19, 2023, additional TER can be charged based on inflows only from retail investors from B 30 cities. It will be based on inflows from retail investors (inflows of amount up to Rs. 2, 00,000/- per transaction, by individual investors shall be considered as inflows from “retail investor”) from B 30 cities, keeping all other conditions of SEBI Circular(s) on charging of additional TER of 30 bps unchanged. Thus, inflows from corporates and institutions from B 30 cities henceforth will not be considered for computing the inflows from B 30 cities for the purpose of additional TER of 30 basis points.

The additional commission for B 30 cities shall be paid as trail only. Note: SEBI vide its letter no. SEBI/HO/IMD-SEC.3/P/DIV/2023/SBI23/1 dated February 24, 2023 and AMFI letter No. 35P/ MEM-COR/85-a/2022-23 dated March 02, 2023 has directed AMCs to keep B-30 incentive structure in abeyance with effect from March 01, 2023 till further notice.

An illustration:

Assuming, an investor has invested Rs.10, 000/- in the scheme having total expense ratio of 2.00%. The scheme generated a CAGR return of 10% over one year. Therefore, Investment Amount (Rs.) (A) = 10,000

Scheme Return (Year) in CAGR (%) (B) = 10%

Return in One Year (Rs.) (C) = (A)*(1+B) = 1,000

Total Expense Ratio (%) (D) = 2.00%

Impact of Total Expense Ratio (Rs.) (E)=A*D = 200

Total Return to the investor (Rs.) (F=C-E) = 800

As mentioned in the illustration above, the schemes return to the investor is impacted by 2.00% due to the expense charged.
Please note that the above is an approximate illustration of the impact of expense ratio on the returns, where the Gross NAV has been simply reduced to the extent of the expenses. In reality, the actual impact would vary depending on the path of returns over the period of consideration. Expenses will be charged on daily net assets. These estimates have been made in good faith as per the information available to the Investment Manager based on past experience but the total expenses shall not exceed the limits permitted by SEBI. Types of expenses charged shall be as per the SEBI (MF) Regulations. The purpose of the above illustration is to assist the investor in understanding the various costs and expenses that an investor in the scheme will bear directly or indirectly.

**Goods and Service Tax (GST):**

GST shall be charged as follows:

- GST on investment and advisory fees shall be charged to the Scheme in addition to the maximum limit on TER as prescribed in Regulation 52 (6) of the SEBI (MF) Regulations.

Provided that any increase or decrease in TER in a mutual fund scheme due to change in AUM and any decrease in TER in a mutual fund scheme due to various other regulatory requirements would not require issuance of any prior notice to the investors. Further, any change in the base TER (i.e. TER excluding additional expenses provided in Regulation 52 (6A) (b) and 52 (6A) (c) of SEBI (Mutual Funds) Regulations, 1996) Goods & Services Tax on investment and advisory fees in comparison to previous base TER charged to the Scheme/Plan shall be communicated to investors of the Scheme/Plan through notice via email or SMS and will be uploaded on the website (www.canararobeco.com) at least three working days prior to effecting such change.

Mandatory Swing Pricing Framework for market dislocation:
With a view of safeguarding the interest of small investors against any large redemptions, SEBI vide its circular SEBI/HO/IMD/IMD-II DOF3/P/CIR/2021/631 dated September 29, 2021 introduced provisions pertaining to Swing Pricing Framework for open ended debt schemes (except overnight funds, Gilt funds and Funds with 10-year maturity funds) as given below:

Meaning of Swing Pricing:
Swing pricing refers to a process for adjusting the NAV’s Net Asset Value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e., flows into or out of the fund) to the investors associated with that activity during the life of a fund, excluding ramp-up period or termination. In other words, Swing Pricing is an anti-dilution technique which helps funds manage liquidity risks internally by effectively passing on transaction costs to the unitholder/investors associated with that activity. In a liquidity-challenged environment, quoted bid/ask spreads and overall trading cost can widen and may not be representative of the executed prices that can be achieved in the market. In such circumstances, swing pricing can be a useful mechanism to contribute to protect the interests of existing investors, specifically from the dilution of their holdings; and contribute to protect the value of the investors capital.

Applicability of Swing Pricing Framework:
The swing pricing framework will be made applicable only for scenarios related to net outflows from the debt schemes.

SEBI will determine ‘market dislocation’ either based on AMFI’s recommendation or suo moto. Once market dislocation is declared, it will be notified by SEBI that swing pricing will be applicable for a specified period.

Subsequent to the announcement of market dislocation, the swing pricing framework shall be mandated only for open ended debt schemes which:
1. Have “High” or “Very High” risk on the risk-o-meter (as of the most recent period at the time of declaration of market dislocation) and
2. Potential Risk Class (PRC) cells A-III, B-II, B-III, C-I, C-II and C-III

Minimum swing factor for open ended debt schemes:
Following mandatory swing factor will be applied on redemption and subscription of the above mentioned schemes during market dislocation period announced by SEBI:

Applicability of Swing Pricing to Investors:
When swing pricing mechanism is triggered and swing factor is made applicable during market dislocation, both the incoming and outgoing investors shall get NAV adjusted for swing factor. Swing pricing shall be made applicable to all unitholders at PAN level, with an exemption for redemptions up to Rs. 2 lakhs for each mutual fund scheme for market dislocation.

If the percentage is not specified, it will be equal percentage for the nominees by default. Provision for mentioning the details of the nominees are made in the KIM/application form and or separate nomination request forms is made available to the investors. The details of the nominee(s) will be captured by the Registrar and will be available in the data base maintained. Upon receipt of intimation, the registered Nominee(s) regarding the demise/accident of the Unit Holder, signature of the nominee, furnishing proof of guardianship if the nominee is a minor, and the execution of an indemnity bond or such other documents as may be required from the nominee in favor of and to the satisfaction of the AMC/Registrar, the units will be transmitted to the nominee(s) as per the percentage advised by the investor and a confirmation/fresh Statement of account will be sent to the new holder(s).

Only the following categories of Indian residents can be nominated: (a) individuals; (b) minors through parent/legal guardian (whose name and address must be provided); (c) religious or comparable trusts; (d) organizations registered under the Societies Act, 1860; (e) Government, a local authority or any person designated by virtue of his office. A nomination in respect of Units will be treated as rescinded upon the Redemption of all Units. Cancellation of a nomination can be made only by the Unit Holders who made the original nomination and must be notified in writing. On receipt of a valid cancellation, the nomination shall be treated as rescinded and the AMC/Fund shall not be under any obligation to transfer the Units in favour of the nominee.

The transfer of Units/payment to the nominee of the Redemption proceeds shall be valid and effective against any demand made upon the Fund/AMC/Trustee and shall discharge the Fund/AMC/Trustee of all liability towards the estate of the deceased Unit Holder and his/her legal personal representative or other successors. The Fund, the AMC and the Trustee are entitled to be indemnified.
Applicants in cities not covered under ECS facility will receive IDCW payments, if any by cheques or demand drafts and the same will be mailed to the Unit holders.

Please note that the ECS facility is available only in respect of IDCW payments and not in the case of Redemption of Units. Therefore, the Investors will receive their redemption/IDCW proceeds (if any) directly into their bank accounts in the following order:

(i) In case the bank account of an investor is covered under RTGS/NEFT system offered by the RBI then the payment of redemption/IDCW proceeds (if any) shall be effected via RTGS/NEFT mechanism only.

(ii) The facility for payment of IDCW proceeds, if any via ECS* shall be effected only in case the bank account of an investor is not covered under the RTGS/NEFT system.

* available only in respect of IDCW payments.

Each of the above facilities aims to provide direct credit of the redemption proceeds and IDCW payouts (if any) into the bank account of the Unit holder and eliminates the time lag between despatch of the cheque, its receipt by the Unit holders and the need to personally bank the instrument and await subsequent credit to the Unit holders account. Further, the potential risk of loss of instruments in transit through courier/post is also eliminated. Each of the said facility as a mode of payment, is faster, safer and reliable. In case the bank account as communicated by the Unit holder is with any of the banks participating in the RTGS/NEFT System offered by the RBI, the AMC shall automatically extend this facility to the Unit holders provided unitholders have furnished all requisite information to the AMC to receive such credits.

Canara Robeco Asset Management Company Limited/Canara Robeco Mutual Fund shall not be held liable for any losses/claims, etc. arising on account of processing the credit via RTGS/NEFT/ECS of redemption/IDCW proceeds on the basis of Bank Account details as provided by the unit holder in the Application Form.

Canara Robeco Asset Management Company Limited/Canara Robeco Mutual Fund shall not be liable for delayed receipt/non receipt of redemption/IDCW amount for reason of incomplete/inaccurate information provided by the unit holders.

However, if the Unit holders are not keen on availing of any of the said facilities and prefer receiving cheques/demand drafts, Unit holders may indicate their intention in the Application Form in the space provided specifically. The AMC would then ensure that the payouts are effected by sending the Unit holders a cheque/demand draft. In case of unforeseen circumstances, the AMC reserves the right to issue a cheque/demand draft.
