## WHAT IS ULTRA SHORT DURATION FUND

- ❑ Ultra Short Duration Funds are debt schemes which invest predominantly in debt & money market instruments towards the shorter end of the curve such that the Macaulay duration of the portfolio is between 3 months and 6 months
- ❑ These funds have average maturity lower than long duration funds / gilt funds, but usually more than Liquid Funds
- ❑ Additionally, as the investment strategy in these funds is to generate accrual income, such funds are less sensitive to changes in interest rates
- ❑ This reduces the volatility of returns making them a suitable solution to park short term surplus
