Fund Features & Other Details

The Allure of Multi Asset Investing

WHY CHOOSE WHEN YOU CAN HAVE IT ALL

The Difference Between Single Asset Investing & Multi Asset Allocation

Single Asset Class

Different Risk Return Characteristics May Not Suit All Investor Type

Returns Differ In Different Market Cycles & Timelines

Possibility of a Higher Drawdown during different Market Cycles

Potential for Higher Volatility in Returns

Multi Asset Class

Includes Different Asset Classes Suitable for Majority of Investor Base

A mix of relatively uncorrelated asset classes likely makes it an all-weather portfolio

Possibility of a Lower Drawdown due to interaction of relatively uncorrelated asset classes

Potential for Relatively Lower Volatility compared to a Single Asset Class

Different Asset Classes, Different Returns

Historically No Asset Class has delivered consistent returns

CY2015	CY2016	CY2017	CY2018	CY2019	CY2020	CY2021	CY2022	CY2023	CY2024

Significance Of Asset Allocation

Asset Class Performance in Different Economic Cycles

The performance of asset classes typically fluctuates in accordance with the changing economic landscape

Equity tends to flourish in times of **recovery**, driven by an upsurge in demand and turnover

In times of inflationary strain and periods of **boom**, commodities such as gold typically experience a rise in value

Bonds typically flourish in environments characterized by economic **slowdown** and declining interest rates

Although no investment can be deemed entirely immune to economic **recession**, certain assets often exhibit superior resilience compared to others

The global landscape of economic cycles and markets is characterized by remarkable dynamism. Consequently, various asset classes exhibit distinct performance patterns influenced by our position within the economic cycle, prevailing global scenarios, and geopolitical developments.

Note: The above statements / analysis should not be construed as an investment advice or a research report or a recommendation and it is given only for illustration purposes. Past performance may or may not be sustained in the future. The above information should not be construed as any guarantee or indication of future results.

Investors shall note that there is no assurance or guarantee that the investment objective of the scheme will be achieved.

Canara Robeco Multi Asset Allocation Fund

Multi Asset Allocation Strategy

STEP 1: Equity Allocation Strategy

Framework checks several factors like TTM(Trailing Twelve Months) P/B(Price to Book Value), Equity Risk Premium and Earnings Momentum, Macro Factors, bottom-up analysis, etc. and tries to optimize Equity Allocation % according to Framework.

Equity range: 65-80% (Derivative exposure upto 50%)

STEP 2: Gold and Silver ETFs Allocation Strategy

Framework then checks Yield Differentials and tries to provide an optimal allocation of Gold & Silver ETFs

Gold and Silver ETFs range: 10-25%

Step 3: Fixed Income Strategy

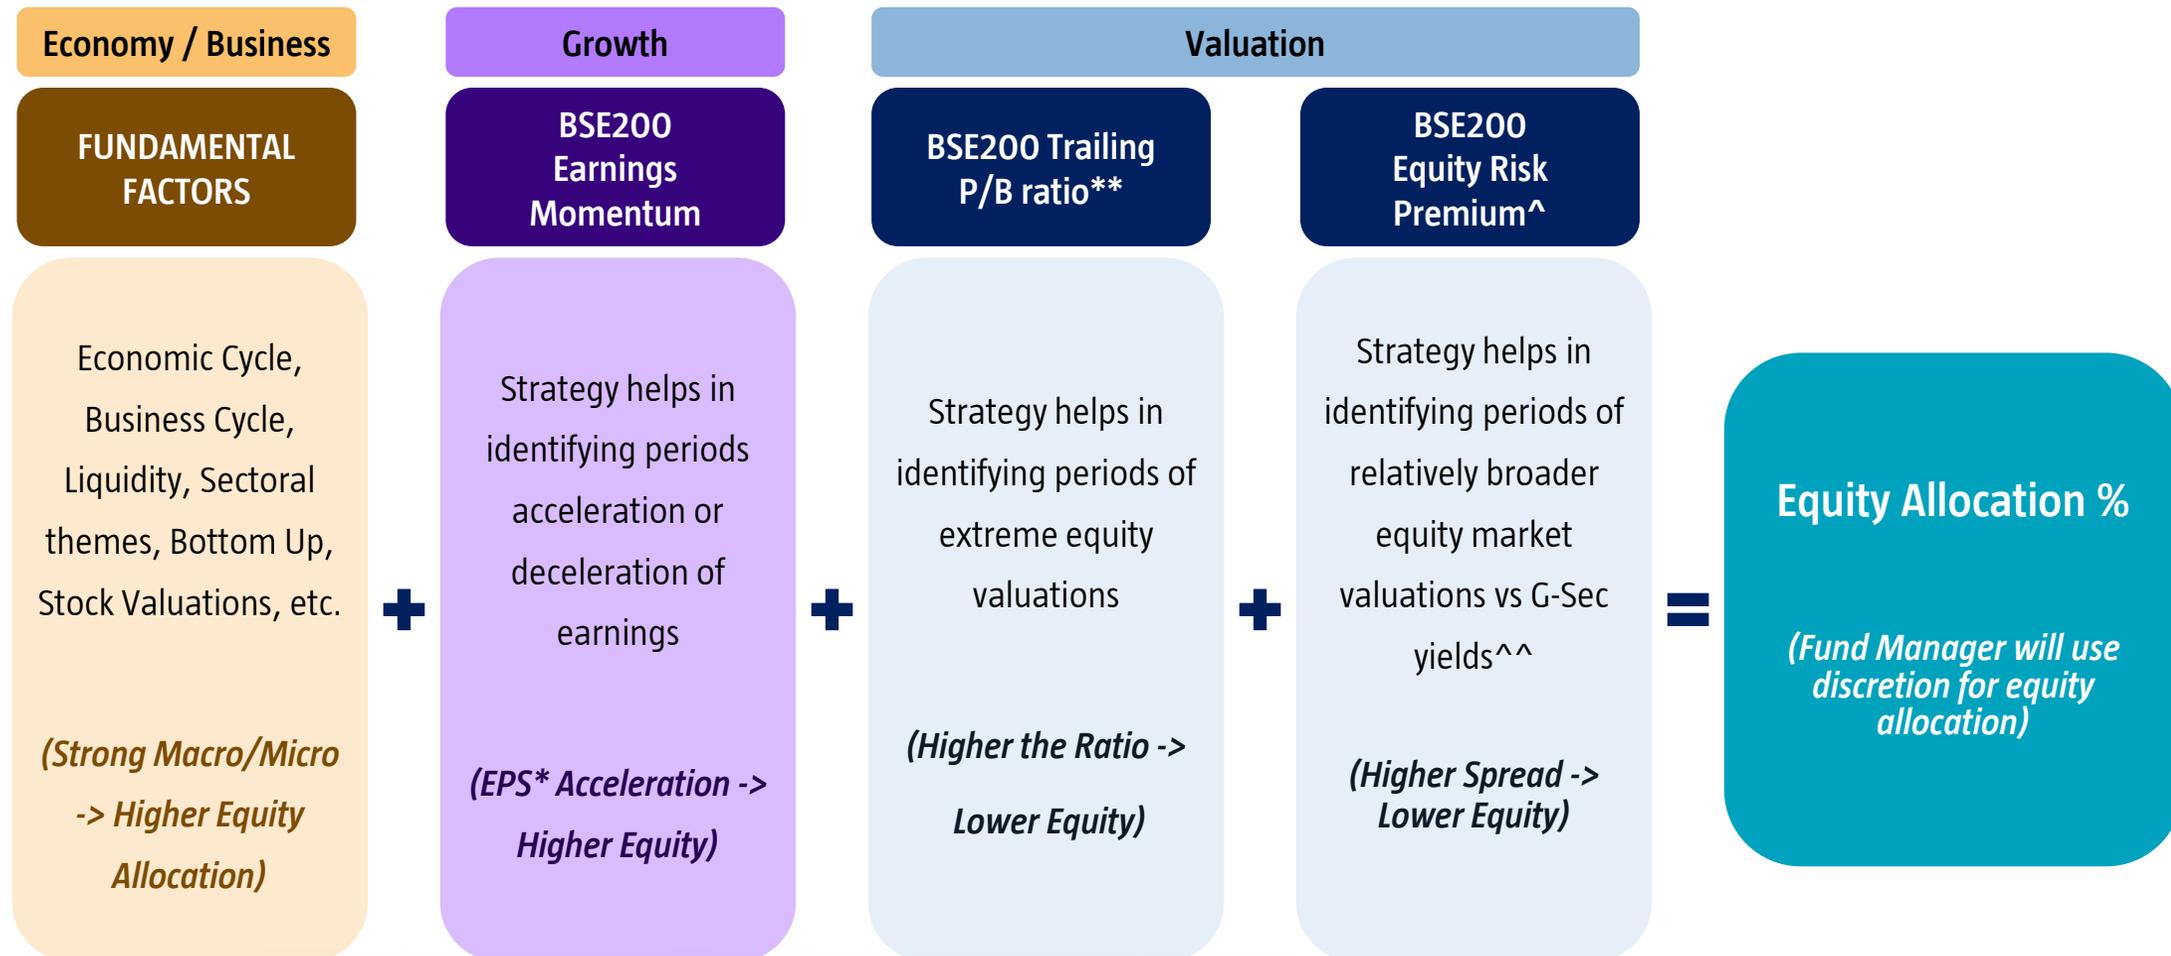

Active Duration management with focus on high credit quality

Debt range: 10-25%

Note: The above figures are a percentage to the total assets of the Scheme. The Scheme may also invest in Units issued by REITs and InvITs. For the detailed asset allocation pattern, please refer the Scheme Information Document (SID) of the Scheme. Investors shall note that there is no assurance or guarantee that the investment objective of the scheme will be achieved. The above is based upon our current fund management/ investment strategy. However, the same shall be subject to change depending on the market conditions.

Canara Robeco Multi Asset Allocation Fund

Investors shall note that there is no assurance or guarantee that the investment objective of the scheme will be achieved. The above is based upon our current fund management/ investment strategy. However, the same shall be subject to change depending on the market conditions.

Canara Robeco Multi Asset Allocation Fund

Equity Portfolio Construction Framework for Canara Robeco Multi Asset Allocation Fund

Equity Exposure

- **Equity (65-80%)** : Gross equity exposure will be maintained at minimum 65% while the **net equity exposure might be lower due to hedging** (arbitrage positions)

Flexibility

- Equity Portion of the Fund would be a **“Market Capitalization, Style & Sector Agnostic”** with an endeavor to create a diversified portfolio spanning multiple sectors & market capitalizations

Diversification

- The scheme will maintain a diversified portfolio

Fund’s Investment Profile

- Fund will invest in - **High Conviction Portfolio** with **“Leaders”** with proven track record across market cycles which would provide strength and compounding to portfolio; as well as in **“Emerging Companies”** with improving market share to lend Alpha to the portfolio through superior earnings growth

Approach

- A combination of **top-down** and **bottom-up** approach of stock selection

Rebalancing

- Rebalancing **periodically**

Note: For the detailed investment strategy, please refer the Scheme Information Document (SID) of the Scheme. Investors shall note that there is no assurance or guarantee that the investment objective of the scheme will be achieved. The above is based upon our current fund management/ investment strategy. However, the same shall be subject to change depending on the market conditions.

Canara Robeco Multi Asset Allocation Fund

Fixed Income Investment Approach

WHY INVEST?

- ❑ Flexible Investment Approach –
 - ✓ Flexibility to Invest Across Debt and Money Market Instruments & Across Durations
- ❑ Quality & Liquidity –
 - ✓ Investments into quality debt and money market instruments
- ❑ Portfolio construction Process –
 - ✓ Robust & coherent Fixed Income Investment Process
 - ✓ Robust Risk Management Framework – essential in freestyle Duration Investing

WHAT IS DYNAMIC STRATEGY?

Flexible Portfolio Allocation

- This strategy will allow the fund manager to switch between short- and long-term bonds depending on the macro-economic and interest rate outlook.

Benefit to the Investor

- The flexibility to realign the portfolio according to interest rate movements, gives the investor an opportunity to capture the upside whilst likely reducing the downside impact
- The flexible mandate may further help in bolstering the portfolio from market volatility

Investor Suitability

- This fund is suitable for investors with medium to long time horizon

Note: For the detailed investment strategy, please refer the Scheme Information Document (SID) of the Scheme. Investors shall note that there is no assurance or guarantee that the investment objective of the scheme will be achieved. The above is based upon our current fund management/ investment strategy. However, the same shall be subject to change depending on the market conditions.

Canara Robeco Multi Asset Allocation Fund

Fixed Income Investment Approach

WHY DYNAMIC STRATEGY?

Dynamic strategy invests across duration that seeks to generate income from a portfolio constituted of debt and money market securities

- > Endeavours to identify mispriced opportunities & capture volatility trends
- > Aims to generate Alpha through free-style duration management
- > Low exposure to credit risk to maintain high portfolio quality

PHILOSOPHY FOCUSED ON QUALITY AND LIQUIDITY

- ❑ ***High Quality Portfolio*** - Predominantly investments are to be in government and state government bonds / AAA and equivalent rated corporate issuers to ensure quality and liquidity
- ❑ ***Active Management*** - Portfolio to be managed dynamically on the basis of short and long term interest rate outlook
- ❑ ***Aims for Alpha Generation*** - Actively tracking spreads within yield curve / across yield curves to capture mis-pricings

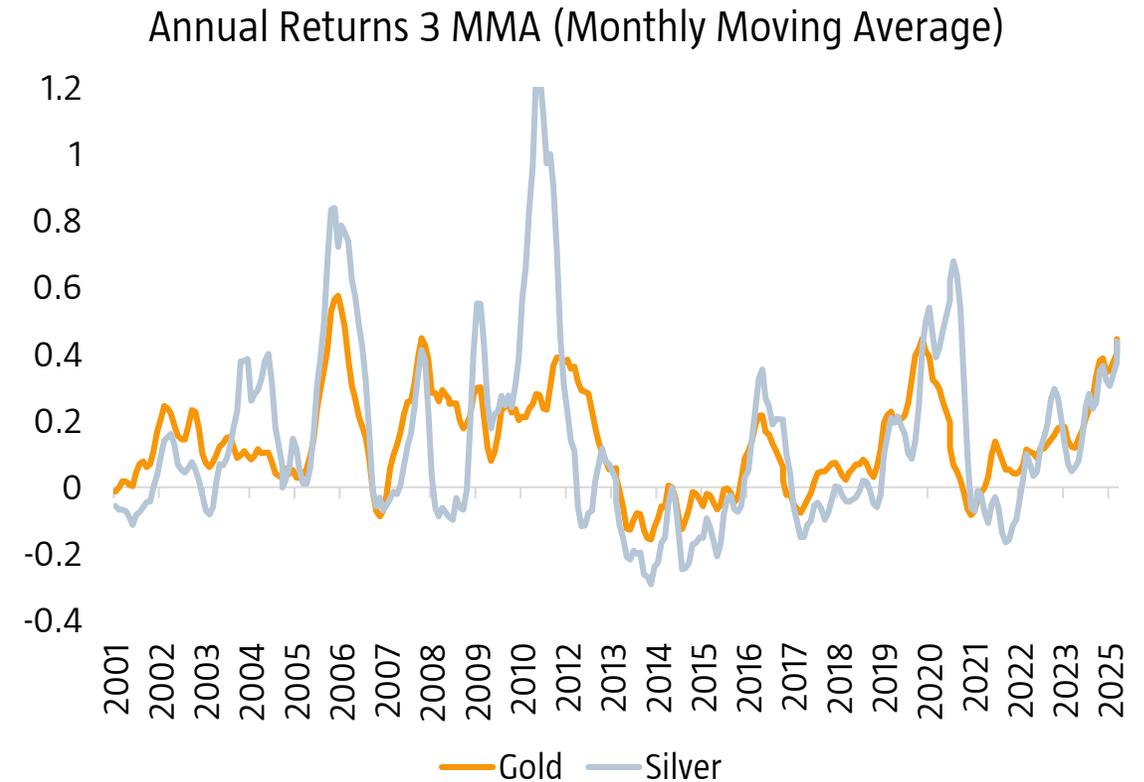

Canara Robeco Multi Asset Allocation Fund

Gold & Silver Characteristics and Correlation

Gold & Silver – Key Investment Thesis

- **Safe-Haven Assets:** Both gold and silver are considered safe-haven assets, meaning investors often flock to them during times of economic uncertainty
- **High Correlation:** Historically, gold and silver prices have shown a strong tendency to move together, with silver prices often mirroring gold's movements
- **Jewelry & Investment Demand:** Gold is primarily used for jewelry and investment
- **Industrial Demand:** Silver has significant industrial applications which can influence its price
- **Silver usually is more volatile compared to Gold** given the narrow market size and lower market liquidity
- **Allocation to Gold and Silver ETFs** will be based on internal research and market outlook

Gold Silver 30 Year Correlation: 0.96

Note: Correlation is a statistical measure that describes the extent to which two variables are related to each other. Correlation between asset classes is calculated by using the mathematical formula for correlation coefficient.

Data used: 31st Mar 2001 – 31st Mar, 2025, Source: Axis Bank, Bloomberg.

Disclaimer: **Past performance may or may not be sustained in the future.**

The data/statistics are given only to explain how different asset classes interact differently with one another. The above information should not be construed as any guarantee or indication of future returns.

Canara Robeco Multi Asset Allocation Fund

Gold & Silver Characteristics and Correlation

Gold & Silver – Key Investment Thesis

- Safe-Haven Assets: Both gold and silver are considered safe-haven assets, meaning investors often flock to them during times of economic uncertainty
- High Correlation: Historically, gold and silver prices have shown a strong tendency to move together, with silver prices often mirroring gold's movements
